FINANCIAL STATEMENT REPORT

SUMMARY

The audit of the accompanying basic financial statements of the State of Illinois, Department of Human Services (Department) was performed by Sikich LLP as special assistants for the Auditor General.

Based on their audit, the auditors expressed an unqualified opinion on the Department's basic financial statements.

SUMMARY OF FINDINGS

The auditors identified matters involving the Department's internal control over financial reporting that they considered to be significant deficiencies. The significant deficiencies are described in the accompanying Schedule of Findings on pages 51-63 of this report, as findings 08-1 through 08-6, summarized as follows:

- 08-1 Consolidated services payments made without sufficient supporting documentation
- 08-2 Liabilities payable from future appropriations are misstated
- 08-3 Inadequate controls over commodities
- 08-4 Commodity inventory system outdated and insufficient for user needs
- 08-5 Inadequate controls over capital asset financial reporting
- 08-6 Failure to comply with Medicare and Medicaid certification requirements

PRIOR FINDING NOT REPEATED

A. Unrecorded and unreported locally held bank accounts

EXIT CONFERENCE

The findings and recommendations appearing in this report were discussed with Department personnel at an exit conference on March 12, 2009. Attending were:

INDEPENDENT AUDITORS' REPORT

Honorable William G. Holland Auditor General State of Illinois

As Special Assistant Auditors for the Auditor General, we have audited the accompanying financial statements of the governmental activities, the major fund, and the aggregate remaining fund information of the State of Illinois, Department of Human Services (the Department), as of and for the year ended June 30, 2008, which collectively comprise the Department's basic financial statements as listed in the table of contents. These financial statements are the responsibility of the Department's management. Our responsibility is to express opinions on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and the significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinions.

As discussed in Note 2, the financial statements of the Department are intended to present the financial position and changes in financial position of only that portion of the governmental activities, the major fund, and the aggregate remaining fund information of the State that is attributable to the transactions of the Department. They do not purport to, and do not, present fairly the financial position of the State of Illinois as of June 30, 2008, and the changes in its financial position for the year then ended in conformity with accounting principles generally accepted in the United States of America.

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the major fund, and the aggregate remaining fund information of the Department, as of June 30, 2008, and the respective changes in financial position thereof for the year then ended in conformity with accounting principles generally accepted in the United States of America.

In accordance with *Government Auditing Standards*, we have also issued a report dated March 16, 2009 on our consideration of the Department's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* and should be considered in assessing the results of our audit.

The Department has not presented a management's discussion and analysis and budgetary comparison information for any of its funds that accounting principles generally accepted in the United States of America has determined is necessary to supplement, although not required to be part of, the basic financial statements.

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the Department's basic financial statements. The combining General Fund, nonmajor governmental fund and Agency fund financial statements and schedules listed in the table of contents as supplementary information are presented for purposes of additional analysis and are not a required part of the basic financial statements. The combining General Fund, nonmajor governmental fund and Agency fund financial statements and schedules have been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, are fairly stated in all material respects in relation to the basic financial statements taken as a whole.

This report is intended solely for the information and use of the Auditor General, the General Assembly, the Legislative Audit Commission, the Governor, the Comptroller, and Department management, and is not intended to be and should not be used by anyone other than these specified parties.

Notes to Financial Statements

June 30, 2008

(1) Organization

The Department of Human Services (the Department) is a part of the executive branch of government of the State of Illinois (State) and operates under the authority of and review by the Illinois General Assembly. The Department operates under a budget approved by the General Assembly in which resources primarily from the General Fund are appropriated for the use of the Department. Activities of the Department are subject to the authority of the Office of the Governor, the State's chief executive officer, and other departments of the executive and legislative branches of government (such as the Department of Central Management Services, the Governor's Office of Management and Budget, the State Treasurer's Office, and the State Comptroller's Office) as defined by the Illinois General Assembly. All funds appropriated to the Department and all other cash received are under the custody and control of the State Treasurer, excluding all locally-held funds authorized by State law.

The Department is organized to assist Illinois residents to achieve self-sufficiency, independence and health to the maximum extent possible by providing integrated family-oriented services, promoting prevention and establishing measurable outcomes in partnership with communities.

(2) Summary of Significant Accounting Policies

The financial statements of the Department have been prepared in accordance with accounting principles generally accepted in the United States of America (GAAP), as prescribed by the Governmental Accounting Standards Board (GASB). To facilitate the understanding of data included in the financial statements, summarized below are the more significant accounting policies.

(a) Financial Reporting Entity

As defined by GAAP, the financial reporting entity consists of a primary government, as well as its component units, which are legally separate organizations for which the elected officials of the primary government are financially accountable. Financial accountability is defined as:

- 1) Appointment of a voting majority of the component unit's board and either (a) the primary government's ability to impose its will, or (b) the possibility that the component unit will provide a financial benefit to or impose a financial burden on the primary government; or
- 2) Fiscal dependency on the primary government.

Based upon the required criteria, the Department has no component units and is not a component unit of any other entity. However, because the Department is not legally separate from the State of Illinois, the financial statements of the Department are included in the financial statements of the State of Illinois. The State of Illinois' Comprehensive Annual Financial Report may be obtained by writing to the State Comptroller's Office, Division of Financial Reporting, 325 West Adams Street, Springfield, Illinois, 62704-1871.

Notes to Financial Statements

June 30, 2008

(b) Basis of Presentation

The financial statements of the State of Illinois, Department of Human Services, are intended to present the financial position and the changes in financial position of only that portion of the governmental activities, each major fund of the State of Illinois, and the aggregate remaining fund information of the State of Illinois that is attributable to the transactions of the Department. They do not purport to, and do not, present fairly the financial position of the State of Illinois as of June 30, 2008 and the changes in financial position for the year then ended in conformity with accounting principles generally accepted in the United States of America.

The financial activities of the Department, which consist only of governmental activities, are reported under the health and social services function in the State of Illinois' Comprehensive Annual Financial Report. For reporting purposes, the Department has combined the fund and government-wide financial statements using a columnar format that reconciles individual line items of fund financial data to government-wide data in a separate column. A brief description of the Department's government-wide and fund financial statements is as follows:

Government-wide Statements: The government-wide statement of net assets and statement of activities report the overall financial activity of the Department, excluding fiduciary activities. Eliminations have been made to minimize the double-counting of internal activities of the Department. The financial activities of the Department consist only of governmental activities, which are primarily supported by taxes and intergovernmental revenues.

The statement of net assets presents the assets and liabilities of the Department's governmental activities with the difference being reported as net assets. The assets and liabilities are presented in order of their relative liquidity by class of asset or liability with liabilities whose average maturities are greater than one year reported in two components - the amount due within one year and the amount due in more than one year.

The statement of activities presents a comparison between direct expenses and program revenues for the health and social services function of the Department's governmental activities. Direct expenses are those that are clearly identifiable with a specific function. Program revenues include (a) charges paid by the recipients of goods or services offered by the programs and (b) grants and contributions that are restricted to meeting the operational or capital requirements of a particular program. Revenues that are not classified as program revenues, including all taxes, are presented as general revenues.

Fund Financial Statements: The fund financial statements provide information about the Department's funds, including fiduciary funds. Separate statements for each fund category - governmental and fiduciary - are presented. The emphasis on fund financial statements is on the major governmental fund, which is displayed in a separate column. All remaining governmental funds are aggregated and reported as nonmajor funds.

The Department administers the following major governmental fund (or portions thereof in the case of shared funds – see note 2(d)) of the State:

General – This is the State's primary operating fund. It accounts for all financial resources of the general government, except those required to be accounted for in another fund. The services which are administered by the Department and accounted for in the General Fund

Notes to Financial Statements

June 30, 2008

include, among others, health and social services. Certain resources obtained from federal grants and used to support general governmental activities are accounted for in the General Fund consistent with applicable legal requirements. The Department's portion of the General Fund is composed of a primary sub-account (General Revenue) and five secondary sub-accounts (Community Developmental Disabilities Services Medicaid Trust, Care Provider Fund for Persons with a Developmental Disability, Health and Human Services Medicaid Trust, Community Mental Health Medicaid Trust, and DHS Recoveries Trust).

Additionally, the Department reports the following fund types:

Governmental Fund Types:

Special Revenue – These funds account for resources obtained from specific revenue sources that are legally restricted to expenditures for specified purposes. Special revenue funds account for, among other things, federal grant programs, taxes levied with statutorily defined distributions and other resources restricted as to purpose.

Permanent – These funds account for resources that are legally restricted to the extent that only earnings, and not principal, may be used for purposes that benefit the government or its citizens.

Fiduciary Fund Types:

Private Purpose – These funds account for resources legally held in trust for use by individuals the Department serves. All resources of these funds, including any earnings on invested resources, may be used to support these individuals. There is no requirement that any portion of these resources be preserved as capital.

Agency – These funds account for receipts from individuals or groups of individuals at the Department's mental health and developmental centers, and schools, as well as electronic benefit transfers, and receipts from the Federal Government for transfer to other funds for social service programs. These funds are collected by the Department, acting in the capacity of an agent, for distribution to other governmental units or designated beneficiaries.

(c) Measurement Focus and Basis of Accounting

The government-wide and fiduciary fund financial statements are reported using the economic resources measurement focus and the accrual basis of accounting. Revenues are recorded when earned and expenses are recorded at the time liabilities are incurred, regardless of when the related cash flow takes place. Nonexchange transactions, in which the Department gives (or receives) value without directly receiving (or giving) equal value in exchange, include intergovernmental grants. Revenue from grants, entitlements, and similar items are recognized in the fiscal year in which all eligibility requirements imposed by the provider have been met.

Governmental funds are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be available when they are collectible

Notes to Financial Statements

June 30, 2008

within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the State considers revenues to be available if they are collected within 60 days of the end of the current fiscal year. Expenditures generally are recorded when the liability is incurred, as under accrual accounting. However, principal and interest on formal debt issues, claims and judgments, and compensated absences are recorded only when payment is due. Capital asset acquisitions are reported as expenditures in governmental funds. Proceeds of general long-term debt and acquisitions under capital leases are reported as other financing sources.

Significant revenue sources which are susceptible to accrual include intergovernmental grants, charges for services, and interest and other investment income. All other revenue sources including fines and other miscellaneous revenues are considered to be measurable and available only when cash is received.

Private-sector standards of accounting and financial reporting issued prior to December 1, 1989, generally are followed in the government-wide financial statements to the extent that those standards do not conflict with or contradict guidance of the Governmental Accounting Standards Board.

(d) Shared Fund Presentation

The financial statement presentation for the General Revenue and Care Provider Fund for Persons with a Developmental Disability subaccounts of the General Fund and the Tobacco Settlement Recovery Fund, Maternal and Child Health Services Block Grant Fund, and Preventive Health and Health Services Block Grant Fund, nonmajor governmental funds, represents only the portion of the shared fund that can be directly attributed to the operations of the Department. Financial statements for total fund operations of the shared State funds are presented in the State of Illinois' Comprehensive Annual Financial Report.

In presenting these financial statements, certain unique accounts are used for the presentation of shared funds. The following accounts are used in these financial statements to present the Department's portion of shared funds:

Unexpended Appropriations

This "asset" account represents lapse period warrants issued between July and August annually in accordance with the Statewide Accounting Management System (SAMS) records plus any liabilities relating to obligations re-appropriated to the subsequent fiscal year.

Appropriations from State Resources

This "other financing source" account represents the final legally adopted appropriation according to SAMS records.

Reappropriation to Future Year(s)

This contra revenue account reduces current year's appropriations by the amount of the reappropriation to reflect the State's realignment of the budgetary needs to the subsequent year and avoid double counting of a portion of the appropriation in more than one fiscal year.

Notes to Financial Statements

June 30, 2008

Lapsed Appropriations

Lapsed appropriations are the legally adopted appropriations less net warrants issued for the 14 month period from July to August of the following year and re-appropriations to subsequent years according to SAMS records.

Receipts Collected and Transmitted to State Treasury

This "other financing use" account represents all cash receipts received during the fiscal year from SAMS records.

Amount of SAMS Transfers-In

This "other financing use" account represents cash transfers made by the Office of the Comptroller in accordance with statutory provisions to the corresponding fund during the fiscal year per SAMS records in which the Department did not make a deposit into the State Treasury.

Amount of SAMS Transfers-Out

This "other financing source" account represents cash transfers made by the Office of the Comptroller in accordance with statutory provision from the corresponding fund during the fiscal year per SAMS records in which a legally adopted appropriation was not charged.

(e) Eliminations

Eliminations have been made in the government-wide statement of net assets to minimize the "grossing-up" effect on assets and liabilities within the governmental activities column of the Department. As a result, amounts reported in the governmental funds balance sheet as interdepartmental interfund receivables and payables have been eliminated in the government-wide statement of net assets. Amounts reported in the governmental funds balance sheet as receivable from or payable to fiduciary funds have been included in the government-wide statement of net assets as receivable from and payable to external parties, rather than as internal balances.

(f) Cash and Cash Equivalents

Cash equivalents are defined as short-term, highly liquid investments readily convertible to cash with maturities of less than 90 days at the time of purchase. Cash and cash equivalents include cash on hand, cash in banks, certificates of deposit, and money market accounts for locally held funds.

(g) Investments

Investments are reported at fair value. The Department holds investments pursuant to statutory authority for locally held funds.

Notes to Financial Statements

June 30, 2008

(h) Inventories

For governmental funds, the Department recognizes the costs of inventories as expenditures when purchased. At year-end, physical counts are taken of significant inventories, consisting primarily of food and drugs maintained at the mental health and developmental centers, in governmental funds and are reported at weighted average cost. The remaining inventories are valued at replacement cost. Inventories reported in governmental funds do not reflect current appropriable resources, and therefore, the Department reserves an equivalent portion of fund balance.

(i) Interfund Transactions

The Department has the following types of interfund transactions between Department funds and funds of other State agencies:

Services provided and used—sales and purchases of goods and services between funds for a price approximating their external exchange value. Interfund services provided and used are reported as revenues in seller funds and expenditures or expenses in purchaser funds. Unpaid amounts are reported as interfund receivables and payables in the governmental funds balance sheets or the government-wide statements of net assets.

Reimbursements—repayments from the funds responsible for particular expenditures or expenses to the funds that initially paid for them. Reimbursements are reported as expenditures in the reimbursing fund and as a reduction of expenditures in the reimbursed fund.

Transfers—flows of assets (such as cash or goods) without equivalent flows of assets in return and without a requirement for repayment. In governmental funds, transfers are reported as other financing uses in the funds making transfers and as other financing sources in the funds receiving transfers.

The Department also has activity with various component units of the State of Illinois for professional services received and payments for State and Federal programs.

Notes to Financial Statements

June 30, 2008

(j) Capital Assets

Capital assets, which include property, plant, and equipment, are reported at cost or estimated historical cost based on appraisals. Contributed assets are reported at estimated fair value at the time received. Capital assets are depreciated using the straight-line method.

| Capital Asset Category | Capitalization Threshold | Estimated Useful Life (in Years) |
|------------------------|-----------------------------|--|
| Land | \$100,000 | N/A |
| Land Improvements | 25,000 | N/A |
| Site Improvements | 25,000 | 3-50 |
| Buildings | 100,000 | 10-60 |
| Building Improvements | 25,000 | 10-45 |

Capitalization thresholds and the estimated useful lives are as follows:

(k) Compensated Absences

The liability for compensated absences reported in the government-wide statement of net assets consists of unpaid, accumulated vacation and sick leave balances for Department employees. A liability for these amounts is reported in governmental funds only if they have matured, for example, as a result of employee resignations and retirements. The liability has been calculated using the vesting method, in which leave amounts for both employees who currently are eligible to receive termination payments and other employees who are expected to become eligible in the future to receive such payments upon termination are included. The liability has been calculated based on the employees' current salary level and includes salary related costs (e.g., Social Security and Medicare taxes).

Legislation that became effective January 1, 1998 capped the paid sick leave for all State Employees' Retirement System members at December 31, 1997. Employees continue to accrue twelve sick days per year, but will not receive monetary compensation for any additional time earned after December 31, 1997. Sick days earned between 1984 and December 31, 1997 (with a 50% cash value) would only be used after all days with no cash value are depleted. Any sick days earned and unused after December 31, 1997 will be converted to service time for purposes of calculating employee pension benefits.

(l) Fund Balances

In the fund financial statements, governmental funds report reservations of fund balance for amounts that are not available for appropriation or are legally restricted by outside parties as to use for specific purposes. Designations of fund balances represent tentative State plans that are subject to change.

Notes to Financial Statements

June 30, 2008

(m) Net Assets

In the government-wide statement of net assets, equity is displayed in three components as follows:

Invested in Capital Assets, Net of Related Debt – This consists of capital assets, net of accumulated depreciation, less the outstanding balances of any bonds, mortgages, notes, or other borrowings that are attributable to the acquisition, construction, or improvement of those assets.

Restricted – This consists of net assets that are legally restricted by outside parties or by law through constitutional provisions or enabling legislation. The Department's restricted net assets are all restricted by enabling legislation. When both restricted and unrestricted resources are available for use, generally it is the State's policy to use restricted resources first, then unrestricted resources when they are needed.

Unrestricted – This consists of net assets that do not meet the definition of "restricted" or "invested in capital assets, net of related debt."

(n) Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

(o) Future Adoption of GASB Statements

Effective for the year ending June 30, 2009 the Department will adopt GASB Statement No. 49, *Accounting and Financial Reporting for Pollution Remediation Obligations*, which establishes standards for accounting and financial reporting for pollution remediation obligations which are obligations to address the current or potential detrimental effects of existing pollution by participating in pollution remediation activities such as site assessments and cleanups. The Department has not yet determined the impact on the Department's financial statements as a result of adopting this statement.

(3) **Deposits and Investments**

(a) Deposits

The State Treasurer is the custodian of the Department's deposits and investments for funds maintained in the State Treasury. The Department independently manages deposits and investments maintained outside the State Treasury.

Deposits in the custody of the State Treasurer are pooled and invested with other State funds in accordance with the Deposit of State Moneys Act of the Illinois Compiled Statutes (15 ILCS 520/11). Funds held by the State Treasurer have not been categorized as to credit risk because

Notes to Financial Statements

June 30, 2008

the Department does not own individual securities. Detail on the nature of these deposits and investments is available within the State of Illinois' Comprehensive Annual Financial Report.

Custodial credit risk is the risk that in the event of a bank failure, the government's deposits may not be returned to it. The Department is required by the State Officers and Employees Money Disposition Act (30 ILCS 230/2c) to obtain a bond, pledged securities, or other eligible collateral equal to or greater than the uninsured portion of the deposit. Deposits for locally-held funds of governmental activities had a carrying amount and a bank balance of \$4.990 and \$5.010 million at June 30, 2008, respectively. Deposits of locally-held funds of fiduciary funds had a carrying amount and a bank balance of \$2.281 million at June 30, 2008. Of the total bank balances, \$2.905 million was exposed to custodial credit risk (amounts expressed in thousands) as follows:

| Uninsured and collateral held by the pledging financial | |
|---|-------------|
| institution (but not in its trust department or agent) | |
| in the Department's name | \$ 1,322 |
| Uninsured and uncollateralized | 1,583 |
| | \$ 2,905 |

(b) Investments

As of June 30, 2008, the Department had the following investments outside of the State Treasury:

| | 1 | Fair Value ousands)_ | Weighted Average Maturity (Years) |
|---|----|----------------------------|--|
| Governmental Funds | | | |
| U.S. Treasury Notes | \$ | 38 | 2.000 |
| U.S. Agency Obligations | | 20 | 3.000 |
| Illinois Public Treasurers' Investment Pool | | 1,081 | 0.068 |
| | \$ | 1,139 | |

Interest Rate Risk: The Department does not have a formal investment policy that limits investment maturities as a means of managing its exposure to fair value losses arising from increasing interest rates.

Credit Risk: The Department does not have a formal investment policy that limits investment choices. The U.S. Agency Obligations were rated Aaa by Moody's and AAA by Standard & Poor's. The Illinois Public Treasurers' Investment Pool was rated AAAm by Standard & Poor's.

Notes to Financial Statements

June 30, 2008

(c) Reconciliation to Statement of Net Assets and Statement of Fiduciary Net Assets

The amounts reported as investments in the Statement of Net Assets and the Statement of Fiduciary Net Assets contain certain long-term deposits to reflect their lack of liquidity. A reconciliation (amounts expressed in thousands) follows:

| Governmental Activities | Equ | Cash and Cash Equivalents/ Deposits | | | | |
|---------------------------------------|-----|---|------|----------|--|--|
| Amounts Per Note | \$ | 4,990 | \$ | 1,139 | | |
| Deposits held for investment purposes | | (1,606) | | 1,606 | | |
| Cash equivalents | | 134 | | (134) | | |
| Petty cash | | 33 | | - | | |
| Amounts per Statement | | | | | | |
| of Net Assets | \$ | 3,551 | \$ | 2,611 | | |
| Fiduciary Funds | Equ | and Cash nivalents/ eposits | Inve | estments | | |
| Amounts Per Note | \$ | 2,281 | \$ | - | | |
| Deposits held for investment purposes | | (1,079) | | 1,079 | | |
| Petty cash | | 20 | | - | | |
| Amounts per Statement | | | | | | |
| | | | | | | |

(4) Other Receivables

Other receivables at June 30, 2008, (expressed in thousands) consisted of the following:

| | Governm | | | | |
|-------------------------------------|-----------|-----------|-----------|--|--|
| | General | Nonmajor | Fiduciary | | |
| Revenue Source | Fund | Funds | Funds | | |
| Fines and fees | \$- | \$ 124 | \$- | | |
| Public assistance recoveries | 465,676 | 129 | - | | |
| Rebates | - | 12,933 | - | | |
| Recipient services | - | 14,576 | - | | |
| Investment and other income | 158 | 21 | 12 | | |
| Total other receivables | 465,834 | 27,783 | 12 | | |
| Allowance for uncollectible amounts | (441,851) | (11,803) | | | |
| Other receivables, net | \$ 23,983 | \$ 15,980 | \$ 12 | | |

Notes to Financial Statements

| | \$ | 2,583 | \$ | 24,438 | \$ | 5 | \$ | 6,006 | |

(b) Transfers to/from Other Funds

Interfund transfers in (amounts expressed in thousands) for the year ended June 30, 2008, were as follows:

| | | Transfer | s-in fi | rom | |
|--------------------------|----|----------------------------|---------|--------------------|---|
| Fund | De | Other partment Funds | | her State Funds | Description/Purpose |
| General | \$ | 42 | \$ | 40,000 | Transfer from other Department funds and other State funds pursuant to statute. |
| Nonmajor governmental | | | | | |
| funds | | 76,939 | | 1,457 | Transfers from other Department funds and other State funds pursuant to statute and annual appropriations bill. |
| | \$ | 76,981 | \$ | 41,457 | |

Notes to Financial Statements

June 30, 2008

Interfund transfers out (amounts expressed in thousands) for the year ended June 30, 2008, were as follows:

| | | Transfe | rs-out | t to | |
|-----------------------------------|------------------------------|---------|----------------------|--------|--|
| Fund | Other Department Funds | | Other State Funds | | Description/Purpose |
| General | \$ | 76,281 | \$ | 10,501 | Transfers to other Department funds pursuant to statute and to other State funds for State budget shortfalls and debt service requirements. |
| Nonmajor governmental funds | | 700 | | - | Transfers to other Department funds pursuant to statute. |
| | \$ | 76,981 | \$ | 10,501 | Parsaan to states. |

(c) Balances due from/to State of Illinois Component Units

The University of Illinois owes the Department \$71 thousand for reimbursement of advances on grant expenditures at June 30, 2008.

The following balances (amounts expressed in thousands) at June 30, 2008 represent amounts due to State of Illinois Component Units for reimbursement for expenses incurred.

| | Due to | | | | |
|----------------------------------|--------|----------------|----------------------------------|-------|--|
| Component Unit | 0 | eneral Fund | Nonmajor Governmental Fund | | |
| Toll Highway Authority | \$ | 1 | \$ | - | |

| Capital leases - equipment | 619 | | 472 | | 147 | |
| Total capital assets | | | | | | |
| being depreciated | 794,182 | 1,239 | 472 | 5,520 | 800,469 | |
| Less accumulated depreciation: | | | | | | |
| Site improvements | 67,483 | 3,739 | _ | _ | 71,222 | |
| Buildings and building | 07,105 | 5,157 | | | /1,222 | |
| improvements | 410,860 | 22,516 | - | - | 433,376 | |
| Equipment | 39,120 | 369 | - | (1,186) | 38,303 | |
| Capital leases - equipment | 348 | 206 | 472 | - | 82 | |
| | | | | | | |
| Total accumulated | | | | | | |
| depreciation | 517,811 | 26,830 | 472 | (1,186) | 542,983 | |
| Total capital assets being | | | | | | |
| depreciated, net | 276,371 | (25,591) | - | 6,706 | 257,486 | |
| 1 / | | | | | | |
| Total capital assets, net | \$ 279,619 | \$ (25,591) | \$ - | \$ 6,706 | \$ 260,734 | |

Depreciation expense for governmental activities (amounts expressed in thousands) for the year ended June 30, 2008 was charged as follows:

Health and social services\$26,830

Notes to Financial Statements

June 30, 2008

During fiscal year 2002, the Department closed the Lincoln Developmental Center which has a book value of \$12.663 million, net of \$32.631 million in accumulated depreciation. It is unknown whether the Center will be placed back into service in the future.

(7) Long-Term Obligations

(a) Changes in Long-Term Obligations

Changes in long-term obligations (amounts expressed in thousands) for the year ended June 30, 2008 were as follows:

| | Balance July 1, 2007 | Additions | | Deletions | | Balance June 30, 2008 | June 30, Due Wit | |
|----------------------------------|----------------------------|-----------|--------|-----------|--------|-----------------------------|------------------|-------|
| Other long-term obligations: | | | | | | | | |
| Compensated Absences | \$ 73,105 | \$ | 92,856 | \$ | 90,814 | \$75,147 | \$ | 3,005 |
| Capital lease obligations | 307 | | - | | 230 | 77 | | 60 |
| Installment purchase obligations | 377 | | 322 | | 187 | 512 | | 169 |
| Total | \$ 73,789 | \$ | 93,178 | \$ | 91,231 | \$75,736 | \$ | 3,234 |

Compensated absences have been liquidated by the applicable governmental funds that account for the salaries and wages of the related employees.

(b) Capital lease obligations

The Department leases office and computer equipment with a historical cost and accumulated depreciation (amounts expressed in thousands) of \$147 and \$82, respectively, under capital lease arrangements. Although lease terms vary, certain leases are renewable subject to appropriation by the General Assembly. If renewal is reasonably assured, leases requiring appropriation by the General Assembly are considered noncancelable leases for financial reporting. Future minimum lease payments (amounts expressed in thousands) at June 30, 2008 are as follows:

| Year Ending | | | | | | |
|-------------|-----------|----|----------|----|-------|----|
| June 30 | Principal | | Interest | | Total | |
| 2009 | \$ | 60 | \$ | 13 | \$ | 73 |
| 2010 | | 17 | | - | | 17 |
| | \$ | 77 | \$ | 13 | \$ | 90 |

Notes to Financial Statements

June 30, 2008

(c) Installment purchase obligations

The Department has acquired certain office equipment, computer equipment, and other assets through installment purchase arrangements. Future debt service requirements under installment purchase contracts (amounts expressed in thousands) at June 30, 2008, are as follows:

| Year Ending June 30 | Principal | | Interest | | Total | | |
|------------------------|-----------|-----|----------|----|-------|-----|--|
| 2009 | \$ | 169 | \$ | 22 | \$ | 191 | |
| 2010 | | 176 | | 15 | | 191 | |
| 2011 | | 113 | | 7 | | 120 | |
| 2012 | | 54 | | 2 | | 56 | |
| | \$ | 512 | \$ | 46 | \$ | 558 | |

(8) Pension Plan

Substantially all of the Department's full-time employees who are not eligible for participation in another state-sponsored retirement plan participate in the State Employees' Retirement System (SERS), which is a pension trust fund in the State of Illinois reporting entity. The SERS is a single-employer defined benefit public employee retirement system (PERS) in which State employees participate, except those covered by the State Universities, Teachers', General Assembly, and Judges' Retirement Systems. The financial position and results of operations of the SERS for fiscal year 2008 are included in the State of Illinois' Comprehensive Annual Financial Report (CAFR) for the year ended June 30, 2008. The SERS issues a separate CAFR that may be obtained by writing to the SERS, 2101 South Veterans Parkway, Springfield, Illinois, 62794-9255.

A summary of SERS benefit provisions, changes in benefit provisions, employee eligibility requirements including eligibility for vesting, and the authority under which benefit provisions are established are included as an integral part of the SERS' CAFR. Also included is a discussion of employer and employee obligations to contribute and the authority under which those obligations are established.

The Department pays employer retirement contributions based upon an actuarially determined percentage of their payrolls. For fiscal year 2008, the employer contribution rate was 16.561%.

(9) **Post-employment Benefits**

The State provides health, dental, vision, and life insurance benefits for retirees and their dependents in a program administered by the Department of Healthcare and Family Services along with the Department of Central Management Services. Substantially all State employees become eligible for post-employment benefits if they eventually become annuitants of one of the State sponsored pension plans. Health, dental, and vision benefits include basic benefits for annuitants and dependents under the State's self-insurance plan and insurance contracts currently in force. Annuitants may be required

Notes to Financial Statements

June 30, 2008

to contribute towards health, dental, and vision benefits with the amount based on factors such as date of retirement, years of credited service with the State, whether the annuitant is covered by Medicare, and whether the annuitant has chosen a managed health care plan. Annuitants who retired prior to January 1, 1998, and who are vested in the State Employee's Retirement System do not contribute towards health, dental, and vision benefits. For annuitants who retired on or after January 1, 1998, the annuitant's contribution amount is reduced five percent for each year of credited service with the State allowing those annuitants with twenty or more years of credited service to not have to contribute towards health, dental, and vision benefits. Annuitants also receive life insurance coverage equal to the annual salary of the last day of employment until age 60, at which time the benefit becomes \$5,000.

The total cost of the State's portion of health, dental, vision, and life insurance benefits of all members, including post-employment health, dental, vision, and life insurance benefits, is recognized as an expenditure by the State in the Illinois Comprehensive Annual Financial Report. The State finances the costs on a pay-as-you-go basis. The total costs incurred for health, dental, vision, and life insurance benefits are not separated by department or component unit for annuitants and their dependents nor active employees and their dependents.

A summary of post-employment benefit provisions, changes in benefit provisions, employee eligibility requirements including eligibility for vesting, and the authority under which benefit provisions are established are included as an integral part of the financial statements of the Department of Healthcare and Family Services. A copy of the financial statements of the Department of Healthcare and Family Services may be obtained by writing to the Department of Healthcare and Family Services, 201 South Grand Ave., Springfield, Illinois, 62763-3838.

(10) Fund Deficits

The Vocational Rehabilitation, Federal National Community Services, Employment and Training, DHS Special Purposes Trust, Early Intervention Services Revolving, and Alcoholism and Substance Abuse, nonmajor governmental funds, had fund deficits (amounts expressed in thousands) of \$1,517, \$201, \$2, \$3,534, \$1,616, and \$7 respectively, at June 30, 2008. These deficits will be eliminated by future recognition of earned but unavailable revenues and from future revenues.

(11) Risk Management

The Department is exposed to various risks of loss related to torts; theft of, damage to, and destruction of assets; aviation liability; auto liability; workers compensation; and natural disasters. The State retains the risk of loss (i.e. self insured) for these risks.

Notes to Financial Statements

June 30, 2008

(12) Commitments and Contingencies

(a) Operating leases

The Department leases office facilities, office equipment, and computer equipment under the terms of noncancelable operating lease agreements that require the Department to make minimum lease payments plus pay a pro rata share of certain operating costs. Rent expense under operating leases was \$15.567 million for the year ended June 30, 2008.

The following is a schedule of future minimum lease payments under operating leases (amounts expressed in thousands):

| Year ending June 30, | An | Amount | | |
|----------------------|----|--------|--|--|
| 2009 | \$ | 979 | | |
| 2010 | | 922 | | |
| 2011 | | 230 | | |
| | \$ | 2,131 | | |

(b) Federal Funding

The Department receives federal grants which are subject to review and audit by federal grantor agencies. Certain costs could be questioned as not being an eligible expenditure under the terms of the grants and subject to repayment by the Department. Generally, no provision for repayment is recorded until the federal grantor agency has determined a repayment is necessary. Identified questioned costs are reported in the State of Illinois Single Audit Report. A copy of the report may be obtained by contacting the State of Illinois Office of the Auditor General, Iles Park Plaza, 740 East Ash Street, Springfield, IL 62703-3154.

For federal grant programs in which questioned costs could be determined, the State of Illinois Single Audit Reports for the years ended June 30, 2007 and June 30, 2006 include questioned costs totaling \$.1 and \$1.0 million, respectively, for the Department that have not been resolved. Management of the Department disagrees with the determination of questioned costs and has provided documentation supporting their position to the federal grantor agency conducting the review. The Department expects questioned costs to be reported in the State of Illinois Single Audit Report for the year ended June 30, 2008.

(c) Litigation

The Department has been named as a defendant in the cases disclosed in the following paragraphs. The Department's opinion based on the current status is that the likelihood of a negative outcome in each case is not probable but could be reasonably possible or it is probable but a loss cannot be reasonably estimated. The Department intends to vigorously defend all of these actions and in the event a material action is settled against the Department, such amounts, would be paid from future appropriations or by another State agency. Accordingly, no amounts have been recorded in the accompanying financial statements related to outstanding litigation.

Notes to Financial Statements

June 30, 2008

Ligas v. Maram is a complaint for declaratory and injunctive relief filed against the Department and the Department of Healthcare and Family Services by individuals with developmental disabilities who claim violation of various federal statutes in connection with defendant's alleged failure to provide them with appropriate services sufficient to permit them to live in more integrated settings. This case has been tentatively settled which would result in changes to Medicaid service delivery.

Colbert v. Blagojevich is a class-action lawsuit that alleges the Department violated federal law by allowing residents of nursing facilities to remain in institutionalized settings, segregated from mainstream society.

Mahneke v. Jerome-Kon is a medical malpractice action involving the suicide of a patient at Tinley Park Mental Health Center. Plaintiff alleges that various staff members acted negligently in their care and treatment of the decedent, which resulted in the patient's elopement and suicide. The case is currently in the discovery phase.

Maitland v. Waitley is a medical malpractice case involving an alleged failure to diagnose plaintiff's chronic fungal meningitis while plaintiff was a patient at Elgin Mental Health Center in 2002. The Department is represented by outside Legal Counsel. The parties are almost finished with fact discovery and will begin expert discovery soon.

Parfait v. Baetiong is a medical malpractice/wrongful death case. Plaintiff's survivor alleges the decedent committed suicide by jumping in front of a train while on a field trip.

Romic v. Tobias is a medical malpractice action involving the suicide of a patient. Plaintiff alleges that various staff members acted negligently in their care and treatment of the decedent, resulting in his suicide.

Williams v. Blagojevich is a complaint for declaratory and injunctive relief filed against the Office of the Governor, the Department, and the Department of Healthcare and Family Services. The plaintiffs are four individuals with mental illness who claim violation of various federal statutes in connection with defendants' alleged failure to provide them with services in the most integrated setting appropriate to their needs. The complaint seeks injunctive relief in the form of relocating individuals from institutional to community settings.

The Department has also been named as a defendant in several other lawsuits relating to the operation of its facilities. While the Department has denied these allegations, the Department's attorneys have determined that possible losses, in presently indeterminable amounts, may arise from these actions. In the event a material action is settled against the Department, such amounts would be paid from future appropriations of the Department or by future appropriations to another State agency.

In addition, the Department is routinely involved in a number of legal proceedings and claims that cover a wide range of matters. In the opinion of management, the outcome of these matters is not expected to have any material adverse effect on the financial position or results of operations of the Department.

Notes to Financial Statements

June 30, 2008

(d) Tax claim

The IRS alleges that the Department faces potential tax liability for an alleged "misclassification" of certain individuals as independent contractors as opposed to employees. The IRS settlement proposal requires the Department to reclassify the independent contractors as employees for Federal employment tax purposes and to pay approximately \$452 thousand to discharge liability for tax years 2000 and 2001. The Department has retained outside legal counsel. If a settlement is not reached, IRS Tax Examination Reports issued in March 2005 estimated the total tax and penalties for tax years 2000 and 2001 to be \$3.9 million. This assessment is not final and could vary depending on the course of action taken by the Department. Subsequent years have not yet been subject to audit.

REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH GOVERNMENT AUDITING STANDARDS

Honorable William G. Holland Auditor General State of Illinois

As Special Assistant Auditors for the Auditor General, we have audited the financial statements of the governmental activities, the major fund, and the aggregate remaining fund information of the State of Illinois, Department of Human Services (the Department), as of and for the year ended June 30, 2008, which collectively comprise the Department's basic financial statements and have issued our report thereon dated March 16, 2009. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States.

Internal Control Over Financial Reporting

In planning and performing our audit, we considered the Department's internal control over financial reporting as a basis for designing our auditing procedures for the purpose of expressing our opinions on the financial statements and not for the purpose of expressing an opinion on the effectiveness of the Department's internal control over financial reporting. Accordingly, we do not express an opinion on the effectiveness of the Department's internal control over financial reporting.

Our consideration of the internal control over financial reporting was for the limited purpose described in the preceding paragraph and would not necessarily identify all deficiencies in the internal control over financial reporting that might be significant deficiencies or material weaknesses. However, as discussed below, we identified certain deficiencies in internal control over financial reporting that we consider to be significant deficiencies.

A control deficiency exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely basis. A significant deficiency is a control deficiency, or combination of control deficiencies, that adversely affects the entity's ability to initiate, authorize, record, process, or report financial data reliably in accordance with generally accepted accounting principles such that there is more than a remote likelihood that a misstatement of the entity's financial statements that is more than inconsequential will not be prevented or detected by the entity's internal control. We consider the deficiencies described in the accompanying Schedule of Findings as items 08-1 through 08-6 to be significant deficiencies in internal control over financial reporting.

A material weakness is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that a material misstatement of the financial statements will not be prevented or detected by the entity's internal control.

Our consideration of the internal control over financial reporting was for the limited purpose described in the first paragraph of this section and would not necessarily identify all deficiencies in the internal control that might be significant deficiencies and, accordingly, would not necessarily disclose all significant deficiencies that are also considered to be material weaknesses. However, we believe that none of the significant deficiencies described is a material weakness.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the Department's financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

We also noted certain matters which we have reported to management of the Department in a separate letter dated March 16, 2009.

The Department's responses to the findings identified in our audit are described in the accompanying Schedule of Findings. We did not audit the Department's responses and, accordingly, we express no opinion on them.

This report is intended solely for the information and use of the Auditor General, the General Assembly, the Legislative Audit Commission, the Governor, and Department management, and is not intended to be and should not be used by anyone other than these specified parties.

Sitich LLP

Springfield, Illinois March 16, 2009

STATE OF ILLINOIS DEPARTMENT OF HUMAN SERVICES

SCHEDULE OF FINDINGS

June 30, 2008

FINDINGS (GOVERNMENT AUDITING STANDARDS)

08-1 <u>FINDING</u>: (Consolidated services payments made without sufficient supporting documentation)

The Department of Human Services (Department) made payments for information technology and press information officers (consolidated services) to the Department of Central Management Services (DCMS), without sufficient supporting documentation.

Public Act 93-25 authorized DCMS to consolidate Information Technology (IT) functions of State government. In addition, Public Act 93-839 authorized DCMS to consolidate Professional Services (Press Information Officers) of State government. As a result of the consolidations, DCMS billed the Department for those services rendered on its behalf.

During the engagement period, we reviewed a total of nineteen vouchers that contained billings for Information Technology and Press Information Officer's Management services and noted the following:

- We reviewed ten vouchers totaling \$3,769,663 for information technology services of which \$3,354,553 (89%) did not have sufficient supporting documentation. Each month the Department received a statement indicating the total charged to the Department. The Department did not receive sufficient supporting documentation to ensure the charges were for services incurred on its behalf. The Department received a spreadsheet listing payroll charges; however, there was no detail to determine if the employee worked on behalf of the Department.
- We reviewed nine vouchers totaling \$108,652 for services relating to Press Information Officer's Management that did not contain adequate supporting documentation. The support for the vouchers included only the electronic invoice generated from the Internet Billing System (IBiS) used by DCMS. The Department was unable to provide detailed documentation for the vouchers regarding actual time spent by Press Information Officers.

SAMS procedure 17.10.30 states, "Agency level pre-auditing is defined as an examination by the agency head or designated individual for the purpose of determining the legality and propriety of a proposed transaction or a transaction in process." Without proper detailed documentation being provided, the Department is approving billings while being unable to determine the propriety of the charges.

Department management stated they were not receiving detailed information for some of the billings from DCMS; however, the Department asserts it maintains a good working relationship with DCMS and communicates any issues regarding rates, charges, and pass-through billings.

In response to this previous finding, the Department stated it is receiving the percentage of time allocated to the Department for information technology services in fiscal year 2008. However, the Department was unable to provide support for the specific work performed on behalf of the Department. The Department stated they would continue to work with DCMS to determine what information could be provided to support Press Information Officer charges.

Because of the significance of the exceptions noted, we are considering this to be a significant deficiency in the Department's internal control. A significant deficiency is a control deficiency, or combination of control deficiencies, that adversely affects the Department's ability to initiate, authorize, record, process, or report financial data reliably in accordance with generally accepted accounting principles.

Failure to obtain adequate supporting documentation could lead to the Department paying for goods and services not incurred on their behalf. (Finding Code No. 08-1, 07-2)

<u>RECOMMENDATION</u>:

We recommend the Department obtain and review detailed documentation prior to paying for the consolidated services to ensure it is only paying for services incurred on its behalf by DCMS.

DEPARTMENT RESPONSE:

The Department accepts the recommendation. The Department began receiving supporting documentation for the Press Information Officer billings in October 2008. The supporting documentation is reviewed to verify the information is sufficient and accurate prior to paying the Department of Central Management Services (DCMS) for the services. The Internet Billing System used by DCMS has been discontinued as of July 1, 2008. DCMS has established fair, equitable rates for production operation services, thus eliminating the need to charge back staff costs to the Department of Human Services.

08-2 <u>FINDING</u>: (Liabilities payable from future appropriations are misstated)

The Department of Human Services (Department) records liabilities payable from future appropriations in its financial statements based on estimates supported by methodologies and historical analyses provided by program personnel. After reviewing subsequent payments related to these liabilities, we noted discrepancies resulting in over and understated liabilities at June 30, 2008 as follows:

- In the DHS Special Purposes Trust Fund (Fund 0408), a \$4.5 million Child Care liability was estimated by increasing the prior year amount by 3% for a cost of living increase. This entire liability was erroneously recorded in Fund 0408. In prior years, this liability was split between the General Revenue Fund (Fund 0001) and Fund 0408. The allocation used in fiscal year 2008 was not consistent with prior years. Actual payments made from Fund 0408 relating to the liability through December of 2008 totaled \$.4 million. The remaining payments of \$3.2 million were made from Fund 0001. As a result, the future year liability recorded in Fund 0408 was overstated by approximately \$4.1 million and the future year liability recorded in Fund 0001 was understated by approximately \$3.2 million. The net effect was an overstatement of approximately \$900,000 for the Child Care program.
- The General Revenue Fund also recorded an estimate for the future year liability for prior year Medicaid bills from the Division of Alcohol and Substance Abuse (DASA) of \$4.0 million. Actual payments made through December 2008 were \$5.2 million, resulting in an understated liability of \$1.2 million

Although none of these errors necessitated a current fiscal year auditor adjustment to the Department's financial records as they were deemed not material, this indicates an internal control weakness in the Department's method for estimating and allocating liabilities.

The Fiscal Control and Internal Auditing Act (Act) (30 ILCS 10/3001) notes State agencies shall establish and maintain a system of internal fiscal and administrative controls, which shall provide assurance that revenues, expenditures, and transfers of assets, resources, or funds applicable to operations are properly recorded and accounted for to permit the preparation of accounts and reliable financial and statistical reports and to maintain accountability over the State's resources.

Department personnel stated the liability that was erroneously recorded in Fund 0408 instead of being split between the funds was due to oversight. Subsequent to the submission of the fund financial information (GAAP package) to the Comptroller, additional information to evaluate the liabilities became available, it was then determined the amount originally reported for the liabilities should have been different.

Because of the significance of these misstatements and the Department's failure in the operation of its internal control to timely identify the errors, we are considering this to be a significant deficiency in the Department's internal control. A significant deficiency is a control deficiency, or combination of control deficiencies, that adversely affects the Department's ability to initiate, authorize, record, process, or report financial data reliably in accordance with generally accepted accounting principles.

When estimation is used to record financial statement amounts, a subsequent analysis should be performed to determine if the estimate should be updated or corrected. (Finding Code No. 08-2, 07-1)

<u>RECOMMENDATION</u>:

We recommend the Department's GAAP coordinator continue to work with program personnel to assist them in evaluating and revising, if necessary, the methodologies used to estimate the Department's liabilities. In cases where the GAAP package preparer is relying on information submitted by program personnel, the Department should develop a historical analysis to determine the reasonableness of estimated liabilities and the methodology used.

DEPARTMENT RESPONSE:

The Department accepts the recommendation. The net affect of the two estimation differences is that Agency liabilities were understated by \$300,000. The estimated liabilities recorded did not necessitate a current fiscal year auditor adjustment to the Department's financial records as the amount was deemed immaterial. The Department's GAAP coordinator will continue to work with program personnel to assist them in evaluating and revising those methodologies as necessary.

08-3 <u>FINDING</u>: (Inadequate controls over commodities)

The Department does not maintain an adequate centralized oversight function over commodities, resulting in inadequate controls. Inventory control includes responsibilities at individual facilities, multiple warehouses, and Central Office locations.

We noted several exceptions and weaknesses over commodities inventories. We performed tests of various locations including warehouses, facilities, schools, and centers, noting the following inventory problems during our testing:

- Weaknesses for periodic inventory counting performed during the year were noted at seven of twenty-three (30%) locations. For example, the Jacksonville Mental Health Center did not complete any periodic inventory counts for the year.
- Weaknesses in segregation of duties for annual inventory counting were noted at three of twenty-three (13%) locations. For example, Mabley Developmental Center had a commodities storekeeper who counted inventory in the same area that they were responsible for in their day to day job responsibilities.
- The Bureau of Pharmacy and Clinical Support Services failed to provide any documentation for who counted the inventory during the year end count and when the count was completed.
- In its Inventory Procedures Memo, the Department required each facility that had over a 2% net adjustment to explain why the discrepancy was so high and develop a corrective action plan. We noted the Bureau of Pharmacy and Clinical Support failed to provide any explanations. Additionally, the remainder of the stores determined their net adjustments by combining the facilities' general store and mechanical store. We feel each store should report its own net adjustment and provide explanations by store. Also, the Department should report the total adjustment for each store because that is the total error rate by store. The Department originally gave 5 explanations and corrective action plans for 43 stores. When changes were made there were 32 out of 43 stores that would have had explanations and corrective action plans.
- We noted the Department had several errors on the Summary of Commodity Control System and Other Inventories, which was used to reconcile to the inventory balance reported for year end GAAP purposes:
 - 1. The Department reported immaterial amounts for two facilities that were no longer operated by the Department.
 - 2. The Department counted the inventory held at ICRE Roosevelt twice on the form.
 - 3. The Department double counted \$16,277 at the Treatment and Detention Facility and \$19,604 at the Howe Developmental Center.

The Fiscal Control and Internal Auditing Act (Act) (30 ILCS 10/3001) notes State agencies shall establish and maintain a system of internal fiscal and administrative controls, which shall provide assurance that revenues, expenditures, and transfers of assets, resources, or funds applicable to operations are properly recorded and accounted for to permit the preparation of accounts and reliable financial and statistical reports and to maintain accountability over the State's resources. In addition, generally accepted accounting principles require the proper valuation and control over annual physical inventory processes to ensure complete and accurate inventories for financial reporting purposes. An improved oversight function would allow the Department to increase the accuracy of reported inventory balances and reduce deficiencies in internal control over maintaining inventory.

The Department stated they have established a centralized oversight for commodities; however, the Department still has more than one person responsible for commodities. To illustrate, they have designated more than one coordinator over the inventory systems. However, we feel that having one central coordinator is important to the process. As an example, as noted in the 3rd and 4th bullet points on the previous page, one coordinator failed to follow procedures stated in the Inventory Procedures Memo, which is what the Department used for guidelines for the year end inventory process.

Because of the significance of the exceptions noted, specifically the overall weaknesses in the inventory and oversight function over commodities, we are considering this to be a significant deficiency in the Department's internal control. A significant deficiency is a control deficiency, or combination of control deficiencies, that adversely affects the Department's ability to initiate, authorize, record, process, or report financial data reliably in accordance with generally accepted accounting principles.

Strong internal controls would require an improved centralized oversight function related to commodities. This is important considering the Department made commodities expenditures of \$36.97 million during fiscal year 2008. In addition, the Department recorded ending commodities inventories of \$9.13 million at June 30, 2008. (Finding Code No. 08-3, 07-4, 06-2, 05-2, 03-15, 03-17, 01-9 and 99-14)

<u>RECOMMENDATION</u>:

We recommend the Department continue establishing a centralized oversight position related to commodities to allow for strengthened controls. Additionally, we recommend that the Department establish a standardized way to perform periodic counts. Finally, we recommend that the Department explain fluctuations for each store and for the total adjustments for each store.

DEPARTMENT RESPONSE:

The Department accepts the recommendation. The Department will continue to strengthen controls over the centralized oversight of commodities. A procedure will be established requiring periodic counts. The Department will require each store to explain fluctuations and develop a corrective action plan for adjustments as necessary.

08-4 <u>FINDING</u>: (Commodity inventory system outdated and insufficient for user needs)

The Department of Human Services (Department) Commodity Control System (CCS) is a batch entry system developed over 30 years ago that does not allow users real time inventory controls regarding inventory management and purchasing.

The CCS is utilized for inventory at all mental health and developmental centers and for the Bureau of Pharmacy and Clinical Support Services pharmaceutical warehouse. The CCS had an inventory balance of approximately \$7.9 million at June 30, 2008.

We noted the CCS does not allow the system user to readily review the purchase history of items to ensure the commodities are accurately priced under the average cost method. Under the average cost method, inventory is valued based on the average purchase price (cost) of the items in stock. We noted 5 of 30 (17%) items tested had recorded values that varied from supporting documentation by more than 5%.

We performed inventory test counts on Thursday, June 26, 2008. Since the CCS only provides for a weekly report, which is run on Sunday nights, actual quantities of stock are not readily available at any given time. For our inventory count on June 26, 2008, we had to reconcile to the quantities on the previous Sunday night's report. Actual inventory counts are not taken on a regular basis at all locations; therefore, any errors throughout the year would not be detected for some time.

In addition, the Department failed to count inventory on June 30th. The Department counted their annual inventory for all stores from June 2nd to June 26th. This meant that the majority of the stores counted their inventory in early June. However, the Department did count the top twenty-five most expensive items in each storeroom on June 30th. Since the Department had so many adjustments in early June, we feel the Department should have counted all of its inventory in its stores on June 30th in order to ensure that inventory was properly stated at the year end.

The Fiscal Control and Internal Auditing Act (Act) (30 ILCS 10/3001) notes State agencies shall establish and maintain a system of internal fiscal and administrative controls, which shall provide assurance that revenues, expenditures, and transfers of assets, resources, or funds applicable to operations are properly recorded and accounted for to permit the preparation of accounts and reliable financial and statistical reports and to maintain accountability over the State's resources.

In addition, generally accepted accounting principles require the proper valuation of inventory for financial reporting purposes. This would require verifying each purchase transaction and updating specific item information as purchases are made throughout the year. This includes utilizing an appropriate cost accounting system to recognize the average cost for all items. By not maintaining appropriate records, the Department's overall inventory could be misstated.

Department personnel stated they sent a proposed Request for Proposal (RFP) to the State's IT Governance Board, however the charter was denied due to the proposed implementation of the Illinois Statewide Information System (ISIS) shared service initiative of the Governor's Office of Management and Budget (GOMB).

Department personnel also stated a weekly hard copy of prior reports was available should we want to attempt to use these for price testing. However, this is not a practical audit or management tool to provide useful, current information.

Because of the significance of the weaknesses in the Department's current Commodity Control System, we are considering this to be a significant deficiency in the Department's internal control. A significant deficiency is a control deficiency, or combination of control deficiencies, that adversely affects the Department's ability to initiate, authorize, record, process, or report financial data reliably in accordance with generally accepted accounting principles.

An outdated computer inventory system may result in over-purchasing, waste, obsolescence, theft, loss, or unauthorized use of State assets, and contributed to the inadequate controls over commodities noted in finding 3. Recording of inventory quantity information is crucial to maintain control over and to properly manage inventory quantities, such as determining reorder and overstocking points. This is especially important due to the size of the Department and the number of users throughout the State. By not maintaining appropriate records, the Department's overall inventory could be materially misstated and the inability to correctly monitor the CCS system may result in inefficiencies. (Finding Code No. 08-4, 07-13, 05-17)

<u>RECOMMENDATION</u>:

We recommend the Department ensure CCS users have access to all necessary information required to manage inventories. The Department should continue to pursue a new system that would include a real-time inventory system with capabilities to access current inventory levels so all inventory unit costs are properly recorded. Periodic testing of the CCS or an upgraded system should also be performed to determine the system is properly calculating inventory values.

DEPARTMENT RESPONSE:

The Department accepts the recommendation. The Department will continue to pursue a new real-time inventory system to allow better management of inventories.

08-5 <u>FINDING</u>: (Inadequate controls over capital asset financial reporting)

The Department of Human Services' (Department) capital asset GAAP Package Forms contain several accounts that are not supported by the Department's capital asset accounting records.

During our testing, we noted the following weakness with the capital asset reporting system. Several accounts on GAAP Package Form *Capital Asset Summary* (SCO-538) could not be traced to supporting records. The Department knew the beginning and ending balance because they had reports that generated the year end balances. As a result, in several instances activity for the year was "netted" and recorded as an equipment addition, when in fact there may have been deletions. For example, the Department has reports that calculate depreciation expense monthly or quarterly. Since it would be cumbersome to accumulate all the reports for the year, the Department records the entire difference between beginning of year and end of year accumulated depreciation as an addition to accumulated depreciation, when in fact there are probably deletions and transfers. Although the difference between "netted" and "gross" totals are not significant, additions, deletions and transfers during the year should be supported.

The Fiscal Control and Internal Auditing Act (Act) (30 ILCS 10/3001) notes State agencies shall establish and maintain a system of internal fiscal and administrative controls, which shall provide assurance that revenues, expenditures, and transfers of assets, resources, or funds applicable to operations are properly recorded and accounted for to permit the preparation of accounts and reliable financial and statistical reports and to maintain accountability over the State's resources.

Department officials stated if additions, deletions, or net transfers are unknown, then the overall net change is used to get to an ending balance that agrees to the Department's property and equipment records. Department records do not always readily reflect the components of addition, deletions, and net transfers.

Because of the significance of the exceptions noted, specifically the weaknesses in the capital asset financial reporting, we are considering this to be a significant deficiency in the Department's internal control. A significant deficiency is a control deficiency, or combination of control deficiencies, that adversely affects the Department's ability to initiate, authorize, record, process, or report financial data reliably in accordance with generally accepted accounting principles.

An important element of internal control is the accurate review, reconciliation and reporting of accounting data. In addition, the Comptroller's SAMS (Procedure 27.20.38) requires a State agency to report capital assets and related accumulated depreciation. (Finding Code No. 08-5, 07-5)

<u>RECOMMENDATION</u>:

We recommend the Department review and revise, as necessary, its current system of gathering property control information to improve the accuracy of its property system records and devote necessary personnel to these tasks.

DEPARTMENT RESPONSE:

The Department accepts the recommendation. A request will be submitted to the Department of Human Services, Management Information Services to develop a reporting mechanism for those assets above and below the capital asset reporting thresholds including their respective depreciation values.

08-6 FINDING: (Failure to comply with Medicare and Medicaid certification requirements)

One of the Department of Human Services (Department) facilities, Howe Developmental Center, continued to remain decertified during fiscal year 2008 due to failure to comply with requirements to be certified as an eligible Medicare or Medicaid service provider. As a result, this center could not bill or be reimbursed for certain services. Department management estimated there is a continuing loss of revenue for this center of approximately \$30 million annually. Failure to maintain eligible Medicare and Medicaid status not only results in lost revenue to the State, but is indicative of a diminished level of care for residents of this facility.

The certification of State operated Centers is administered by different organizations depending on their type. Mental health centers must comply with requirements reviewed by the Centers for Medicare and Medicaid Services (CMMS) and the developmental disability centers must comply with requirements reviewed by the Illinois Department of Public Health, (IDPH). The certification requirements are numerous and complex.

On September 5, 2008, the Department of Human Services announced a proposed closure of the Center. In compliance with the State Facilities Closure Act, the Department submitted its formal recommendation to the Commission on Government Forecasting and Accountability (CGFA). The State Facilities Closure Act requires the CGFA, within specified time frames, host a public comment period and public hearing prior to voting on an advisory opinion about a proposed closure. After compliance with the public comment period and the public hearing, the CGFA convened on January 12, 2009 to vote on the advisory opinion for the closure of Howe, but decided to delay the vote.

The Tinley Park Mental Health Center (Tinley), which was decertified on February 23, 2007, has applied for its recertification with the CMMS. It has moved from a decertified status to conditional accreditation but as of January 15, 2009, still awaits a final site visit or survey and approval by the CMMS.

Tinley patients who were Medicare and Medicaid eligible were immediately 'deflected' to other facilities (Madden and Chicago-Read) that were able to bill for these services. Department management stated no revenue was lost on these residents during fiscal year 2008.

Because of the Department's failure to comply with Medicare and Medicaid certification requirements, we are considering this to be a significant deficiency in the Department's internal control. A significant deficiency is a control deficiency, or combination of control deficiencies, that adversely affects the Department's ability to initiate, authorize, record, process, or report financial data reliably in accordance with generally accepted accounting principles.

The Department was not aware of any other facilities with certification issues as of January 15, 2009. (Finding Code No. 08-6, 07-6)

<u>RECOMMENDATION</u>:

We recommend the Department continue its efforts to recertify Tinley Park Mental Health Center. The Department should also seek final resolution of issues related to Howe Developmental Center so as to limit the amount of revenue being lost to the State.

DEPARTMENT RESPONSE:

The Department accepts the recommendation.

Tinley Park Mental Health Center:

Tinley Park Mental Health Center submitted an application for re-survey to the Centers for Medicare and Medicaid Services (CMMS) in December 2007. Since then, additional follow-up documentation has been requested and submitted to CMMS. Site surveys, to review Federal and State regulations by CMMS, are currently pending.

Howe Developmental Center:

Once the Division of Developmental Disabilities receives the advisory opinion from the Commission on Government Forecasting and Accountability, the Department will be able to seek final resolution regarding issues related to the Howe Developmental Center. In an effort to reduce the amount of revenue lost, the Center will continue to work with guardians to facilitate transfers to community settings and other State Operated Developmental Centers.

PRIOR FINDING NOT REPEATED (GOVERNMENT AUDITING STANDARDS)

A. Unrecorded and unreported locally held bank accounts

The previous engagement noted the Department opened and operated five locally held bank accounts without notifying the Office of the State Comptroller of the establishment of the accounts, and then did not file the required quarterly reports with the Comptroller. In addition, the Department did not record the activity or related assets of the accounts on the Department's financial accounting records, and did not report the accounts to the Office of the Auditor General, as required by State law. During the current engagement, we noted the Department is filing the required quarterly reports with the Comptroller and including the activity and related assets of the accounts in the Department's financial statements. (Finding Code No. 07-3)
