### State of Illinois Department of Transportation

### Financial Statement Report Summary June 30, 2006

The audit of the accompanying financial statements of the State of Illinois, Department of Transportation was performed by BKD, LLP.

Based on their audit, the accountants expressed an unqualified opinion on the Department's basic financial statements.

### **Independent Auditors' Report**

Honorable William G. Holland Auditor General State of Illinois

As Special Assistant Auditors for the Auditor General, we have audited the accompanying financial statements of the governmental activities, each major fund and the aggregate remaining fund information of the State of Illinois, Department of Transportation (Department) as of and for the year ended June 30, 2006, which collectively comprise the Department's basic financial statements as listed in the table of contents. These financial statements are the responsibility of the Department's management. Our responsibility is to express opinions on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinions.

As discussed in Note 1, the financial statements of the State of Illinois, Department of Transportation, are intended to present the financial position, the changes in financial position and cash flows, where applicable, of only that portion of the governmental activities, each major fund and the aggregate remaining fund information of the State that is attributable to the transactions of the Department. They do not purport to, and do not, present fairly the financial position of the State of Illinois as of June 30, 2006, and its changes in financial position and its cash flows, where applicable, thereof for the year then ended in conformity with accounting principles generally accepted in the United States of America.

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, each major fund and the aggregate remaining fund information of the State of Illinois, Department of Transportation, as of June 30, 2006, and the respective changes in financial position and cash flows, where applicable, thereof for the year then ended in conformity with accounting principles generally accepted in the United States of America.

As discussed in Note 12, the Department has restated Road Fund and Total Governmental Funds fund balances at July 1, 2005.

In accordance with Government Auditing Standards, we have also issued our report dated November 9, 2006, on our consideration of the State of Illinois, Department of Transportation's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with Government Auditing Standards and should be considered in assessing the results of our audit.

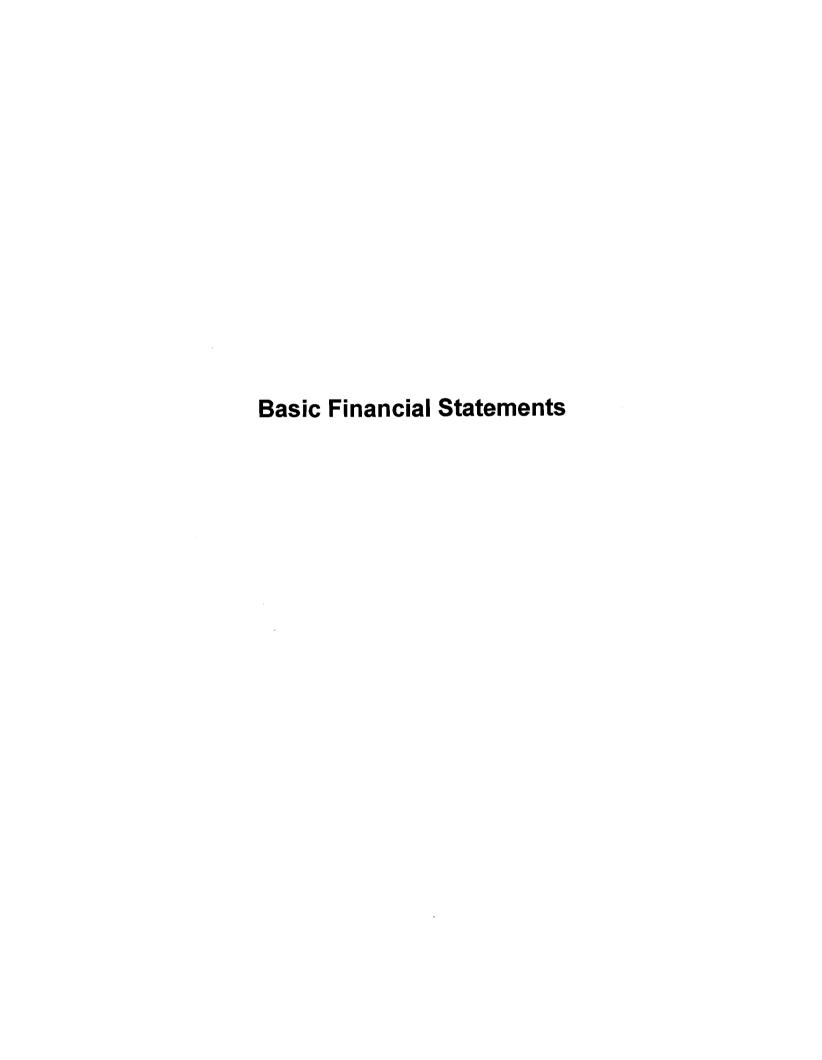

The Department has not presented a management's discussion and analysis and budgetary comparison schedules for the General, Road, Motor Fuel Tax, and State Construction funds that accounting principles generally accepted in the United States of America determined are necessary to supplement, although not required to be part of, the basic financial statements.

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the State of Illinois, Department of Transportation's basic financial statements. The combining nonmajor fund financial statements are presented for purposes of additional analysis and are not a required part of the basic financial statements. The combining nonmajor fund financial statements have been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, are fairly stated in all material respects in relation to the basic financial statements taken as a whole.

This report is intended solely for the information and use of the Auditor General, the General Assembly, the Legislative Audit Commission, the Governor, the Comptroller and agency management and is not intended to be and should not be used by anyone other than these specified parties.

BKD, LLP

November 9, 2006

### Reconciliation of the Statement of Revenues, Expenditures, and Changes in Fund Balances of Governmental Funds to the Statement of Activities For the Year Ended June 30, 2006 (Expressed in Thousands)

Net change in fund balances Change in inventories	\$ 14,967 13,674
Change in inventories	28,641
Amounts reported for governmental activities in the Statement of Activities are different because:	
Governmental funds report capital outlays as expenditures while governmental activities report depreciation expense to allocate those expenditures over the life of the assets. This is the amount by which capital outlays exceeded depreciation in the current period.	459,764
Repayment of long-term debt is reported as an expenditure in governmental funds, but the repayment reduces long-term liabilities in the Statement of Net Assets.	1,811
Some capital assets were transferred out to other State agencies and therefore, no proceeds were received for the capital asset's value	(24,348)
Revenues in the Statement of Activities that do not provide current financial resources are not reported as revenue in the funds. This amount represents the increase in unavailable revenue over the prior year.	16,690
Proceeds from sales of capital assets are reported in the governmental funds. However, in the Statement of Activities, losses on the disposal of the net value of capital assets are also reported.	(775)
Internal service funds are used to charge costs of certain activities to individual funds.  The net revenue of the internal service fund is reported as governmental activities in the Statement of Activities.	(244)
Some expenses reported in the Statement of Activities do not require the use of current financial resources and therefore are not reported as expenditures in governm ental funds.  Below are such activities:	
Increase in compensated absence	(554)
Decrease in intergovernmental financing	1,423
Increase in auto liability claims	 (4,221)
Change in net assets of governmental activities	\$ 478,187

The accompanying notes to the financial statements are an integral part of this statement.

### (1) Organization

The Department of Transportation (the Department) is a part of the executive branch of government of the State of Illinois (State) and operates under the authority of and review by the Illinois General Assembly. The Department operates under a budget approved by the General Assembly in which resources primarily from the Road Fund, the Motor Fuel Tax Fund and the State Construction Fund are appropriated for the use of the Department. Activities of the Department are subject to the authority of the Office of the Governor, the State's chief executive officer, and other departments of the executive and legislative branches of government (such as the Department of Central Management Services, the Governor's Office of Management and Budget, the State Treasurer's Office, and the State Comptroller's Office) as defined by the Illinois General Assembly. All funds appropriated to the Department and all other cash received are under the custody and control of the State Treasurer, with the exception of locally-held retainage accounts authorized by State law.

The Department is organized to provide safe, cost-effective transportation for Illinois in ways that enhance quality of life, promote economic prosperity, and demonstrate respect for our environment.

### (2) Summary of Significant Accounting Policies

The financial statements of the department have been prepared in accordance with accounting principles generally accepted in the United States of America (GAAP), as prescribed by the Governmental Accounting Standards Board (GASB). To facilitate the understanding of data included in the financial statements, summarized below are the more significant accounting policies.

### (a) Financial Reporting Entity

As defined by GAAP, the financial reporting entity consists of a primary government, as well as its component units, which are legally separate organizations for which the elected officials of the primary government are financially accountable. Financial accountability is defined as:

- (1) Appointment of a voting majority of the component unit's board and either (a) the primary government's ability to impose its will, or (b) the possibility that the component unit will provide a financial benefit to or impose a financial burden on the primary government; or
- (2) Fiscal dependency on the primary government.

Based upon the required criteria, the Department has no component units and is not a component unit of any other entity. However, because the Department is not legally separate from the State of Illinois, the financial statements of the Department are included in the financial statements of the State of Illinois. The State of Illinois' Comprehensive Annual Financial Report may be obtained by writing to the State Comptroller's Office, Division of Financial Reporting, 325 West Adams Street, Springfield, Illinois, 62704-1871.

Notes to Financial Statements

June 30, 2006

### (b) Basis of Presentation

The financial statements of the State of Illinois, Department of Transportation, are intended to present the financial position, the changes in financial position, and the cash flows, when applicable, of only that portion of the governmental activities, each major fund of the State of Illinois, and the aggregate remaining fund information of the State of Illinois that is attributable to the transactions of the Department. They do not purport to, and do not, present fairly the financial position of the State of Illinois as of June 30, 2006, and the changes in financial position for the year then ended in conformity with accounting principles generally accepted in the United States of America.

The financial activities of the Department, which consist only of governmental activities, are reported under the transportation function in the State of Illinois' Comprehensive Annual Financial Report. A brief description of the Department's government-wide and fund financial statements is as follows:

Government-wide Statements: The government-wide statement of net assets and statement of activities report the overall financial activity of the Department. Eliminations have been made to minimize the double-counting of internal activities of the Department. The financial activities of the Department consist only of governmental activities, which are primarily supported by taxes, license and fees, charges for services, and intergovernmental revenues.

The statement of net assets presents the assets and liabilities of the Department's governmental activities with the difference being reported as net assets. The assets and liabilities are presented in order of their relative liquidity by class of asset or liability with liabilities whose average maturities are greater than one year reported in two components – the amount due within one year and the amount due in more than one year.

The statement of activities presents a comparison between direct expenses and program revenues for the transportation function of the Department's governmental activities. Direct expenses are those that are clearly identifiable with a specific function. Program revenues include (a) charges paid by the recipients of goods or services offered by the programs and (b) grants and contributions that are restricted to meeting the operational or capital requirements of a particular program. Revenues that are not classified as program revenues, including all taxes, are presented as general revenues.

Fund Financial Statements: The fund financial statements provide information about the Department's funds. Separate statements for each fund category – governmental and proprietary - are presented. The emphasis on fund financial statements is on major governmental funds, each displayed in a separate column as determined at the statewide level. All remaining governmental funds are aggregated and reported as nonmajor funds.

### Notes to Financial Statements

June 30, 2006

The Department administers the following major governmental funds (or portions thereof in the case of shared funds – see note 2(d)) of the State:

General – This is the State's primary operating fund. It accounts for all financial resources of the general government, except those required to be accounted for in another fund. The services which are administered by the Department and accounted for in the General Fund include, among others, public transportation and air transportation for the Governor and State Legislature on official business. Certain resources obtained from federal grants and used to support general governmental activities are accounted for in the General Fund consistent with applicable legal requirements.

Road – This fund accounts for the activities of the State highway programs including highway maintenance and construction, traffic control and safety, and administering motor vehicle laws and regulations. Funding sources include federal aid, State motor fuel taxes and various license and fee charges.

Motor Fuel Tax – This fund accounts for the activities for various transportation related program expenditures and the administrative cost of supervising the use of funds apportioned to municipalities, counties and road districts. Funding sources include State fuel taxes and an allocation (transfer) of State sales tax collections from the General Fund. The Department's portion of the Motor Fuel Tax Fund is composed of the following sub-accounts: Motor Fuel Tax - State, Motor Fuel Tax - Counties, Motor Fuel Tax - Municipalities, and Motor Fuel Tax - Townships and Road District.

State Construction Account – This fund accounts for the construction, reconstruction, and maintenance of the State maintained highway system. Funding sources include a portion of motor vehicle registration fees, weight taxes, and transfers from the Motor Fuel Tax Fund.

The Department also reports the following proprietary fund type:

Internal Service – This fund accounts for air travel provided to other departments or agencies of the government, or to other governments, on a cost reimbursement basis.

### (c) Measurement Focus and Basis of Accounting

The government-wide and proprietary fund financial statements are reported using the economic resources measurement focus and the accrual basis of accounting. Revenues are recorded when earned and expenses are recorded at the time liabilities are incurred, regardless of when the related cash flow takes place. Nonexchange transactions, in which the Department gives (or receives) value without directly receiving (or giving) equal value in exchange, include intergovernmental grants. Revenue from grants, entitlements, and similar items are recognized in the fiscal year in which all eligibility requirements imposed by the provider have been met.

### Notes to Financial Statements

June 30, 2006

Governmental funds are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be available when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the State considers revenues to be available if they are collected within 60 days of the end of the current fiscal year. Expenditures generally are recorded when the liability is incurred, as under accrual accounting. However, 1) principal and interest on formal debt issues, such as bonds and capital leases, are recorded only when payment is due and 2) compensated absences and claims and judgments are recorded when they are expected to be liquidated with expendable available financial resources. Capital asset acquisitions are reported as expenditures in governmental funds. Proceeds of general long-term debt and acquisitions under capital leases are reported as other financing sources.

Significant revenue sources which are susceptible to accrual include federal aid and motor fuel tax revenue. All other revenue sources including fines, penalties, licenses and other miscellaneous revenue are considered to be measurable and available only when cash is received.

Private-sector standards of accounting and financial reporting issued prior to December 1, 1989, generally are followed in the government-wide and proprietary fund financial statements to the extent that those standards do not conflict with or contradict guidance of the Governmental Accounting Standards Board. The State also has the option of following subsequent private-sector guidance for their business-type activities and enterprise funds, subject to this same limitation. The State has elected not to follow subsequent private-sector guidance as it relates to the Department's operations.

### (d) Shared Fund Presentation

The financial statement presentation for General Revenue Fund, Road Fund, Motor Fuel Tax Fund, and State Construction Account Fund represents only the portion of shared funds that can be directly attributed to the operations of the Department. Financial statements for total fund operations of the shared State funds are presented in the State of Illinois' Comprehensive Annual Financial Report.

In presenting these financial statements, certain unique accounts are used for the presentation of shared funds. The following accounts are used in these financial statements to present the Department's portion of shared funds:

### Unexpended Appropriation

This "asset" account represents lapse period warrants issued between July and August annually in accordance with the Statewide Accounting Management System (SAMS) records plus any liabilities relating to obligations re-appropriated to the subsequent fiscal year.

### Appropriation from State Resources

This "other financing source" account represents the final legally adopted appropriation according to SAMS records.

### Notes to Financial Statements

June 30, 2006

### Reappropriation to Future Year(s).

This contra revenue account reduces current year's appropriations by the amount of the reappropriation to reflect the State's realignment of the budgetary needs to the subsequent year and avoid double counting of a portion of the appropriation in more than one fiscal year.

### Net Change in Liabilities for Reappropriated Accounts.

This account reflects the amount which should be added to or subtracted from the current year appropriation for shared funds to reflect the increase or decrease from prior year to current year for amounts included in obligations for reappropriated accounts which are liabilities at June 30 of the prior year and June 30 of the current year.

### Lapsed Appropriations

Lapsed appropriations are the legally adopted appropriations less net warrants issued for the 14 month period from July to August of the following year and re-appropriations to subsequent years according to SAMS records.

### Receipts Collected and Transmitted to State Treasury

This "other financing use" account represents all cash receipts received during the fiscal year from SAMS records, including prior year refunds.

### **Amount of SAMS Transfers-Out**

This "other financing source" account represents cash transfers made by the Office of the Comptroller in accordance with statutory provision from the corresponding fund during the fiscal year per SAMS records in which a legally adopted appropriation was not charged.

### Amount of SAMS Transfers-In

This "other financing use" account represents cash transfers made by the Office of the Comptroller in accordance with statutory provisions to the corresponding fund during the fiscal year per SAMS records in which the Department did not make a deposit into the State Treasury.

### Notes to Financial Statements

June 30, 2006

### (e) Eliminations

Eliminations have been made in the government-wide statement of net assets to minimize the "grossing-up" effect on assets and liabilities within the governmental column of the Department. As a result, amounts reported in the governmental funds balance sheet and proprietary funds statement of net assets as interdepartmental interfund receivables and payables have been eliminated in the government-wide statement of net assets. Amounts reported in the governmental funds balance sheet and proprietary funds statement of net assets as receivable from or payable to fiduciary funds have been included in the government-wide statement of net assets as receivable from and payable to external parties, rather than as internal balances. Also, eliminations have been made in the statement of activities to remove the "doubling-up" effect of interdepartmental internal service fund activity.

### (f) Cash and Cash Equivalents

Cash equivalents are defined as short-term, highly liquid investments readily convertible to cash with maturities of less than 90 days at time of purchase. Cash and cash equivalents include cash on hand, petty cash funds, and cash held in local bank accounts as retainage due to contractors.

### (g) Inventories

Inventories, consisting primarily of road salt and sand, traffic signs, and traffic sign materials, are valued at cost on the average cost method. Significant inventories of governmental funds are recorded as expenditures when purchased rather than when consumed. Inventories reported in the governmental funds do not reflect current appropriable resources, and therefore, the Department reserves an equivalent portion of fund balance.

### (h) Interfund Transactions

The Department has the following types of interfund transactions between Department funds and funds of other State agencies:

Services provided and used — sales and purchases of goods and services between funds for a price approximating their external exchange value. Interfund services provided and used are reported as revenues in seller funds and expenditures or expenses in purchaser funds. Unpaid amounts are reported as interfund receivables and payables in the governmental funds balance sheets or the government-wide and proprietary statements of net assets.

**Reimbursements** – repayments from the funds responsible for particular expenditures or expenses to the funds that initially paid for them. Reimbursements are reported as expenditures in the reimbursing fund and as a reduction of expenditures in the reimbursed fund.

### Notes to Financial Statements

June 30, 2006

**Transfers** — flows of assets (such as cash or goods) without equivalent flows of assets in return and without a requirement for repayment. In governmental funds, transfers are reported as other financing uses in the funds making transfers and as other financing sources in the funds receiving transfers. In proprietary funds, transfers are reported after nonoperating revenues and expenses.

The Department also has activity with the State of Illinois component units primarily related to research grants and purchases of services.

### (i) Capital Assets

Capital assets, which includes property, plant, and equipment and infrastructure, are reported at cost or estimated historical cost. Contributed assets are reported at estimated fair value at the time received. Capital assets are depreciated using the straight-line method.

Capitalization thresholds and the estimated useful lives are as follows:

Capital Asset Category	Capitalization Threshold	Estimated Useful Life (in Years)
Infrastructure Land Land Improvements	\$250,000 100,000 25,000	20-40 N/A N/A
Site Improvements Buildings	25,000 100,000	3-50 10-60
Buildings Improvements Equipment	25,000 5,000	10-45 3-25

### (j) Compensated Absences

The liability for compensated absences reported in the government-wide and proprietary statements of net assets consists of unpaid, accumulated vacation and sick leave balances for Department Employees. A liability for these amounts is reported in governmental funds only if they have matured, for example, as a result of employee resignations and retirements. The liability has been calculated using the vesting method, in which leave amounts for both employees who currently are eligible to receive termination payments and other employees who are expected to become eligible in the future to receive such payments upon termination are included. The liability has been calculated based on the employees' current salary level and includes salary-related costs (e.g., Social Security and Medicare taxes).

Legislation that became effective January 1, 1998 capped the paid sick leave for all State Employees' Retirement System members at December 31, 1997. Employees continue to accrue twelve sick days per year, but will not receive monetary compensation for any additional time earned after December 31, 1997. Sick days earned between 1984 and December 31, 1997 (with a 50% cash value) would only be used after all days with no cash value are depleted. Any sick days earned and unused after December 31, 1997 will be converted to service time for purposes of calculating employee pension benefits.

### Notes to Financial Statements

June 30, 2006

### (k) Fund Balances

In the fund financial statements, governmental funds report reservations of fund balance for amounts that are not available for appropriation or are legally restricted by outside parties for use for specific purpose. Designations of fund balances represent tentative State plans that are subject to change.

### (l) Net Assets

In the government-wide and proprietary fund statements of net assets, equity is displayed in three components as follows:

Invested in Capital Assets, Net of Related Debt – This consists of capital assets, net of accumulated depreciation, less the outstanding balances of any bonds, mortgages, notes, or other borrowings that are attributable to the acquisition, construction, or improvement of those assets.

**Restricted** – This consists of net assets that are legally restricted by outside parties or by law through constitutional provisions or enabling legislation. When both restricted and unrestricted resources are available for use, generally it is the State's policy to use restricted resources first, then unrestricted resources when they are needed.

Unrestricted – This consists of net assets that do not meet the definition of "restricted" or "invested in capital assets, net of related debt."

### (m) Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

### (3) Deposits

The State Treasurer is the custodian of the State's cash and cash equivalents for funds maintained in the State Treasury. Deposits in the custody of the State Treasurer, or in transit, totaled \$74.757 million at June 30, 2006. These deposits are pooled and invested with other State funds in accordance with the Deposit of State Moneys Act of the Illinois Compiled Statutes (15 ILCS 520/11). Funds held by the State Treasurer have not been categorized as to credit risk because the Department does not own individual securities. Detail on the nature of these deposits and investments is available within the State of Illinois' Comprehensive Annual Financial Report.

Cash on deposit for locally held funds had a carrying amount and bank balance of \$23.760 million at June 30, 2006. Of the total bank balance, \$1.796 million was exposed to custodial credit risk as uninsured with collateral held by the pledging financial institution (but not its trust department or agent) in the State's name, \$0.269 million was exposed to custodial credit risk as uninsured with collateral not held in the State's name and \$15.379 million was exposed to custodial credit risk as uninsured and uncollateralized.

Cash on hand totaled \$5 thousand at June 30, 2006.

### Notes to Financial Statements

Depreciation expense for governmental activities (amounts expressed in thousands) for the year ended June 30, 2006 was charged to the following functions as follows:

Transportation

\$ 954,786

### Notes to Financial Statements

June 30, 2006

### (6) Long -Term Obligations

### (a) Changes in Long-Term Obligations

Changes in long-term obligations (amounts expressed in thousands) for the year ended June 30, 2006 were as follows:

	_	Balance July 1, 2005	 Additions	_	Deletions		Balance June 30, 2006	 Amounts Due Within One Year
Governmental activities:								
Notes Payable								
Intergovernmental financing	\$	5,155	\$ 304	\$	1,727	\$	3,732	\$ 1,802
Installment purchase obligations		411	_	-	411			· <u> </u>
Other long-term obligations:								
Certificates of participation		27,580			1,380		26,200	1,450
Capital lease obligations		31	<del></del>		20		11	11
Auto liability claims		3,486	6,121		2,307		7,300	2,236
Compensated absences	_	38,619	 23,059		22,505		39,173	 1,462
Total	\$_	75,282	\$ 29,484	\$	28,350	\$_	76,416	\$ 6,961

Compensated absences have been liquidated by the applicable governmental funds that account for the salaries and wages of the related employees. Claims and judgments typically have been liquidated from the Road Fund.

The Department has recognized a liability of \$36 thousand in the Road Fund as of June 30, 2006, representing auto liability claims that were due as of year end. The remaining auto liability claims of \$7.264 million, and all other long-term obligations are considered to be general long-term liabilities and are recognized only in the government-wide financial statements.

### Notes to Financial Statements

June 30, 2006

### (b) Intergovernmental Financing - State of Illinois/State of Missouri Joint Agreement

The Department entered into an agreement with the State of Missouri for the construction of the Cape Girardeau Bridge. The agreement required that the Department reimburse the State of Missouri for 40% of the costs incurred for bridge construction. In accordance with a pre-established payment plan, the Department repays one-quarter of its annual obligation each year for four years following the year costs were incurred. Each year, the State of Missouri incurs costs and each year, the Department makes payments on costs incurred in prior years (unless such costs have been totally reimbursed) subject to the same one-quarter reimbursement arrangement. The State of Missouri assesses 5.3% interest on the unpaid balance.

As of June 30, 2006, the balance of the Illinois/Missouri Joint Agreement was \$3.732 million and is included in the government-wide financial statements. In subsequent years, this liability will be liquidated from future resources of the State Construction Fund, a major governmental fund. Future Illinois/Missouri Joint Agreement debt service requirements at June 30, 2006, are as follows:

Illinois/Missouri Joint Agreement (Rounded to Nearest Thousand)

	_	(Rounded to Nearest Thousand)							
Year Ending June 30		Principal	_	Interest	_	Total			
2007	\$	1,802	\$	198	\$	2,000			
2008		898		102		1,000			
2009		945		55		1,000			
2010		87		5		92			
	\$	3,732	\$	360	\$	4,092			

### Notes to Financial Statements

June 30, 2006

### (c) Capital Lease Obligations

The Department leases land, office facilities, office and computer equipment, and other assets with a historical cost and accumulated depreciation of \$40 thousand and \$30 thousand, respectively, under capital lease arrangements. Although lease terms vary, certain leases are renewable subject to appropriation by the General Assembly. If renewal is reasonably assured, leases requiring appropriation by the General Assembly are considered non-cancelable leases for financial reporting. Interest varies from 4.4% - 6.4%. Future minimum lease payments (amounts expressed in thousands) at June 30, 2006 are as follows:

Year Ended June 30		Principal	_	Interest	Total	
2007	\$	11	\$	1	\$ 12	

### (d) Certificates of Participation

The Department financed the purchase of certain Department-owned real and personal property (District 1 headquarters) through a third party (non-State issued) certificate. This non-state issued certificate is sold by a private concern and is repaid by Department appropriations pursuant to an installment purchase agreement. Interest varies from 3.9% - 5.5%. Future debt service requirements under certificates of participation (amounts expressed in thousands) at June 30, 2006, are as follows:

Year Ending June 30		Principal	_	Interest	_	Total
2007	\$	1,450	\$	1,456	\$	2,906
2008		1,520	•	1,383		2,903
2009		1,600		1,305		2,905
2010		1,680		1,222		2,902
2011		1,770		1,134		2,904
2012-2016		10,395		4,124		14,519
2017-2019		7,785		928		8,713
	\$_	26,200	\$_	11,552	\$_	37,752

Notes to Financial Statements

June 30, 2006

### (7) Pension Plan

Substantially all of the Department's full-time employees who are not eligible for participation in another state-sponsored retirement plan participate in the State Employees' Retirement System (SERS), which is a pension trust fund in the State of Illinois reporting entity. The SERS is a single-employer defined benefit public employee retirement system (PERS) in which State employees participate, except those covered by the State Universities, Teachers', General Assembly, and Judges' Retirement Systems. The financial position and results of operations of the SERS for fiscal year 2006 are included in the State of Illinois' Comprehensive Annual Financial Report (CAFR) for the year ended June 30, 2006. The SERS issues a separate CAFR that may be obtained by writing to the SERS, 2101 South Veterans Parkway, Springfield, Illinois, 62794-9255.

A summary of SERS benefit provisions, changes in benefit provisions, employee eligibility requirements including eligibility for vesting, and the authority under which benefit provisions are established are included as an integral part of the SERS' CAFR. Also included is a discussion of employer and employee obligations to contribute and the authority under which those obligations are established.

The Department pays employer retirement contributions based upon an actuarially determined percentage of their payrolls. For fiscal year 2006, the employer contribution rate was 7.792%. Effective for pay periods beginning after December 31, 1991, the State opted to pay the employee portion of retirement for most State agencies (including the Department) with employees covered by the State Employees' and Teachers' Retirement Systems. However, effective with the fiscal year 2004 budget, the State opted to stop paying the portion or a part of the portion of retirement for many State agencies (including the Department) for certain classes of employees covered by the State Employees' and Teachers' Retirement Systems. The pickup, when applicable, is subject to sufficient annual appropriations and those employees covered may vary across employee groups and State agencies.

### (8) Post-employment Benefits

The State provides health, dental and life insurance benefits for certain retirees and their dependents. Substantially all State employees become eligible for post-employment benefits if they eventually become annuitants of one of the State sponsored pension plans. Health and dental benefits include basic benefits for annuitants under the State's self-insurance plan and insurance contracts currently in force. Life insurance benefits are limited to \$5,000 per annuitant age 60 and older. The total cost of health, dental, and life insurance benefits of all members, including post-employment health, dental, and life insurance benefits, is recognized as an expenditure for the State in the Illinois Comprehensive Annual Financial Report. The total costs incurred for health, dental, and life insurance benefits are not separated by Department for annuitants and their dependents nor active employees and their dependents.

### (9) Fund Deficits

The Federal Local Airport Fund, Federal Civil Preparedness Administrative Fund, and Federal Mass Transit Fund had deficit fund balances (amounts expressed in thousands) of \$3,266, \$257, and \$277 respectively, at June 30, 2006. These deficits will be eliminated by future recognition of earned but unavailable revenues and future grant resources.

### Notes to Financial Statements

June 30, 2006

### (10) Risk Management

The Department is exposed to various risks of loss related to torts; theft of, damage to, and destruction of assets; aviation liability; workers compensation and natural disasters. The State retains the risk of loss (i.e. self-insured) for these risks.

The Department's risk management activities for auto liability claims are financed through appropriations to the Department and are reported in the Road Fund. The claims are administered by the Illinois Department of Central Management Services. Liabilities are reported when it is probable that a loss has occurred and the amount of that loss can be reasonably estimated. Liabilities include an amount for claims that have been incurred but not reported (IBNR). Claims liabilities are based upon the estimated ultimate cost of settling the claims including specific, incremental claim adjustment expenses, salvage, and subrogation and considering the effects of inflation and recent claim settlement trends including frequency and amount of payouts and other economic and social factors. The amounts of settlements did not exceed insurance coverage for any of the past three years. During the prior fiscal year the payment of workers compensation liabilities were transferred to the Illinois Department of Central Management Services. Changes in the reported liabilities of the Department (amounts expressed in thousands) for the years ended June 30, 2005 and 2006 were as follows:

	Beginning of Fiscal-year Liability		Cla Ch	Current-year Claims and Changes in Estimates		Claim yments	Li Ma	ansfer of ability to Central magement Services	End of Fiscal-year Liability	
2005	\$	29,256	\$	1,085	\$	1,525	\$	25,330	\$	3,486
2006	\$	3,486	\$	6,121	\$	2,307	\$		\$	7,300

### (11) Commitments and Contingencies

### (a) Construction Commitments

The Department has outstanding construction contracts for highway program improvements. The Department's commitments with contractors was \$2.196 billion at June 30, 2006.

### (b) Operating Leases

The Department leases various real property and equipment under the terms of noncancelable operating lease agreements that require the Department to make minimum lease payments plus pay a pro rata share of certain operating costs. Rent expense under operating leases was \$5.876 million for the year ended June 30, 2006.

### Notes to Financial Statements

June 30, 2006

The following is a schedule of future minimum lease payments under the operating leases (amounts expressed in thousands):

Year Ending June 30	A	Amount		
2007	\$	43		
2008	·	43		
2009		32		
	\$	118		

### (c) Federal Funding

The Department receives federal grants which are subject to review and audit by federal grantor agencies. Certain costs could be questioned as not being an eligible expenditure under the terms of the grants. At June 30, 2006, there were no material questioned costs that have not been resolved with the federal awarding agencies. However, questioned costs could still be identified during audits to be conducted in the future. Management of the Department believes there will be no material adjustments to the federal grants and, accordingly, has not recorded a provision for possible repayment.

### (d) Litigation

The Department is routinely involved in a number of legal proceedings and claims that cover a wide range of matters. In the opinion of management, the outcome of these matters is not expected to have any material adverse effect on the financial position or results of operations of the Department.

### (12) Restatement of Prior Year's Financial Statements

The beginning fund balance of the Road Fund and Total Governmental Funds have been restated for \$13.292 million of unavailable revenue, receivable not collected in the period of availability, which was incorrectly recognized as revenue in previous fiscal years. The change in fund balance in the Road Fund and Total Governmental Funds would have been \$3.022 million less than the amount reported for the year ended June 30, 2005. A summary of the correction (amounts expressed in thousands) follows:

	_	Road Fund	 Total Governmental Funds
Fund balances July 1, 2005, as originally reported	\$	164,336	\$ 282,403
Correction for revenue recognition		(13,292)	 (13,292)
Fund balances July 1, 2005, as restated	\$	151,044	\$ 269,111
