## FINDINGS, CONCLUSIONS, AND RECOMMENDATIONS

#### INFORMATION SECURITY WEAKNESSES

The Illinois State University (University) had computer security weaknesses.

During testing, we identified the following information security-related weaknesses:

### User access management policies not finalized

# • While the University had formed the Office of Identity and Access Management (OIAM), the new OIAM had not finalized its drafting of policies and procedures related to user access management, including ensuring the policies and procedures (1) reflect the University's current environment and (2) address future changes in processes and new systems.

#### Access reviews not conducted

# • The University had not conducted access reviews of all system administrators and processes, including those users with access to the University's primary financial system.

## Password change requirements not enforced

• The University was not enforcing its password change requirements for all users. (Finding 1, pages 6-7 in the *Government Auditing Standards* report)

We recommended the University implement adequate security, including:

- finalizing the policies and procedures related to user access management to (1) reflect the University's current environment and (2) address future changes in processes and new systems;
- finalizing the corrective action plan by ensuring all required access reviews are performed, documented, and cover all users, including system administrators; and.
- ensuring password requirements comply with policies and are consistently enforced to all users.

University officials agreed with our recommendation.

#### **AUDITOR'S OPINION**

The auditors stated the financial statements of the University as of and for the year ended June 30, 2019, are fairly stated in all material respects.

This financial audit was conducted by RSM US LLP.
