Holders of University of Illinois
Health Services Facilities System Revenue Bonds
and The Board of Trustees of the University of Illinois:

I am pleased to transmit the Annual Financial Report of the University of Illinois Health Services Facilities System for the fiscal year ended June 30, 2016. This report supplements the financial statements of the University of Illinois presented in the Annual Financial Report.

The 2016 financial statements and accompanying notes appearing on pages 4 through 32 have been audited by CliftonLarsonAllen LLP, Independent Certified Public Accountants, as special assistants to the Auditor General of the State of Illinois, whose report on the financial statements appears on pages 2 and 3.

CliftonLarsonAllen LLP will also prepare a report for the year ended June 30, 2016, containing special data requested by the Auditor General and another report covering their audit of the compliance of the University with applicable state and federal laws and regulations for the year ended June 30, 2016. These reports, which include some data related to the Health Services Facilities System, are not contained herein and are primarily for the use of the Auditor General and state and federal agencies.

Very truly yours,

INDEPENDENT AUDITORS' REPORT

Honorable Frank J. Mautino
Auditor General, State of Illinois
and Board of Trustees
University of Illinois

Report on the Financial Statements

As Special Assistant Auditors for the Auditor General, we have audited the accompanying financial statements of the business-type activities of the University of Illinois Health Services Facilities System (the System) as of and for the year ended June 30, 2016, and the related notes to the financial statements, which collectively comprise the System's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in Government Auditing Standards, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Honorable Frank J. Mautino
Auditor General, State of Illinois
and Board of Trustees
University of Illinois

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the business-type activities for the System as of June 30, 2016, and the changes in financial position and, where applicable, cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Emphasis of Matter

As discussed in Note 1(a), the financial statements of the System are intended to present the financial position, the changes in financial position, and cash flows of only that portion of the business-type activities of University of Illinois that is attributable to the transactions of the System. They do not purport to, and do not, present fairly the financial position of University of Illinois as of June 30, 2016, and its changes in financial position and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

Other Matters

Report on Summarized Comparative Information

We have previously audited the Systems' 2015 financial statements, and we expressed an unmodified audit opinion on those audited financial statements in our report dated December 23, 2015. In our opinion, the summarized comparative information presented herein as of and for the year ended June 30, 2015, is consistent, in all material respects, with the audited financial statements from which it has been derived.

Required Supplementary Information

Management has omitted the Management's Discussion and Analysis that accounting principles generally accepted in the United States of America required to be presented to supplement the basic financial statements. Such missing information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of the financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. Our opinion on the basic financial statements is not affected by this missing information.

Other Reporting Required by Government Auditing Standards

In accordance with Government Auditing Standards, we have also issued our report under separate cover dated February 1, 2017, on our consideration of the System's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with Government Auditing Standards in considering the System's internal control over financial reporting and compliance.

Net cash (used in) provided by operating activities	$ (28,748,261)	$ 47,934,408
Noncash investing, capital, and financing activities:		
On-behalf payments for fringe benefits	$ 235,059,283	$ 198,745,979
State appropriation	11,104,600	43,987,500
Transfers to Illinois Hospital Services Fund	(11,104,600)	(43,987,500)
Other capital asset adjustments	304,269	(246,092)
Net interest capitalized	802,478	4,236,195
Increase of capital assets obligations in accounts payable	1,194,570	1,216,580
Loss on disposal of capital assets	(35,455)	(205,645)
Capital assets placed in service subsequent to obligation incurrence		341,241

See accompanying notes to financial statements.

(1) Organization and Summary of Significant Accounting Policies

Organization

The University of Illinois Health Services Facilities System (System) comprises the University of Illinois Hospital (Hospital) and associated clinical facilities providing patient care at, but not limited to, the University of Illinois at Chicago Medical Center. The System is a tertiary care facility located primarily in Chicago, Illinois offering a full range of clinical services. The System does not include the operations of the University of Illinois' Medical Service Plans or Colleges of Medicine. Management of the System is the responsibility of the University of Illinois (University).

The System was established by a Bond Resolution (Resolution) of the Board of Trustees (Board) of the University of Illinois adopted on January 22, 1997. These financial statements have been prepared to satisfy the requirements of the 1997B, 2008 and 2013 bond indentures. The financial balances and activities of the System, included in these financial statements, are included in the University's financial statements. The financial statements of the System are prepared in accordance with U.S. generally accepted accounting principles as prescribed by the Governmental Accounting Standards Board (GASB). The System is not a separate legal entity and has not presented management's discussion and analysis.

The financial statements include certain prior year comparative information that has been derived from the System's 2015 financial statements. Such information does not include all of the information required to constitute a presentation in conformity with U.S. generally accepted accounting principles. Accordingly, such information should be read in conjunction with the System's financial statements for the year ended June 30, 2015.

Certain items in the June 30, 2015 comparative information have been reclassified to correspond to the June 30, 2016 financial statement presentation.

Significant Accounting Policies

(a) Financial Statement Presentation and Basis of Accounting

The System prepared its financial statements as a Business Type Activity, as defined by GASB Statement No. 35, *Basic Financial Statements – and Management's Discussion and Analysis – for Public Colleges and Universities*, using the economic resources measurement focus and the accrual basis of accounting. Business Type Activities are those financed in whole or in part by fees charged to external parties for goods and services.

Under the accrual basis, revenues are recorded when earned, and expenses are recorded when a liability is incurred, regardless of the timing of the related cash flows. Advances are classified as unearned revenues.

(b) Cash and Cash Equivalents

The Statement of Cash Flows details the change in the cash and cash equivalents balance for the fiscal year. Cash and all liquid investments with original maturities of ninety days or less are defined as cash and cash equivalents.

(c) Investments

Investments are reported at fair value in accordance with guidelines defined by GASB Statement No. 72. Fair value is determined for the System's investments based upon a framework described in Note 2(f). Bank deposits and money market funds are recorded at cost.

Changes in fair value during the reporting period are reported as a net increase (decrease) in the fair value of investments. Net investment income includes interest, dividends, and realized gains and losses.

(d) Inventories

Inventories of pharmaceutical and other supplies are stated at the lower of cost, determined using the first-in, first-out method, or market.

(e) Capital Assets

Capital assets are recorded at cost or, if donated, at acquisition value at the date of a gift. Depreciation of capital assets is calculated on a straight-line basis over the estimated useful lives (see below) of the respective assets. The System's policy requires the capitalization of land and collection purchases regardless of cost, equipment over $5,000, software, easements, buildings and improvements over $100,000 and infrastructure over $1,000,000. The System does not capitalize collections, such as works of art or historical treasures, which are held for public exhibition, education or research in furtherance of public service rather than capital gain, unless they were previously capitalized as of June 30, 1999. Proceeds from the sale, exchange or other disposal of any item belonging to a collection must be applied to the acquisition of additional items for the same collection.

Estimated useful lives for capital assets are as follows:

	Useful life (in years)		**Useful life (in years)**
Buildings:		Improvements other than buildings:	
Shell	50	Site improvements	20
Service systems	25	Infrastructure	25
Fixed equipment	15	Moveable equipment:	
Remodeling	25	Equipment	3 – 20
Intangibles:			
Software	5 – 10		

(f) Deferred Outflow of Resources

Under hedge accounting, the University has determined that the interest rate swap agreement on the System's bonds payable, as a hedging derivative instrument, is an effective hedge. Accordingly, changes in the fair value of the interest rate swap, since being associated with the related outstanding bonds, is reported as a deferred outflow of resources on the accompanying Statement of Net Position. Additionally, an interest rate swap reassigned to new debt, after a refunding of debt that the swap previously hedged, normally has an other than zero fair value upon the reassociation. For a swap with a fair value of other than zero upon reassociation with a hedgeable item, the fair value is amortized as an adjustment to interest expense in a systematic manner.

Losses on refundings for the System's bonds are reported as deferred outflow of resources on the accompanying Statement of Net Position. The losses on refundings are amortized over the life of the debt using the straight-line method.

Deferred Outflow of Resources	Beginning balance	Additions	Deductions	Change in fair value	Ending balance
Interest rate swap agreement that hedges Series 2008 bonds	$ 3,370,742	78,300		515,138	$ 3,964,180
Unamortized deferred loss on refunding	2,820,635		(250,733)		2,569,902
Total deferred outflow of resources	$ 6,191,377	78,300	(250,733)	515,138	$ 6,534,082

(g) Compensated Absences

Accrued compensated absences for System personnel are charged as an operating expense, using the vested method, based on earned but unused vacation and sick leave days including the System's share of Social Security and Medicare taxes. The estimated outstanding liability at June 30, 2016 was $23,328,219.

(h) Premiums

Premiums for the System's bonds are reported within long-term debt and amortized over the life of the debt issue using the straight-line method.

(i) Net Position

The System's resources are classified into net position categories and reported in the Statement of Net Position. These categories are defined as (a) Net investment in capital assets – capital assets net of accumulated depreciation and related outstanding debt balances attributable to the acquisition, construction, or improvement of those assets, (b) Restricted – net position subject to externally imposed restrictions that can be fulfilled by actions of the System pursuant to those stipulations or that expire by the passage of time, and (c) Unrestricted – net position not subject to externally imposed stipulations but may be designated for specific purposes by action of management or the Board. The System first applies resources included in restricted net position when an expense or outlay is incurred for purposes for which resources in both restricted and unrestricted net positions are available.

(j) Classification of Revenues

The Statement of Revenues, Expenses and Changes in Net Position classifies the System's fiscal year activity as operating and nonoperating. Operating revenues generally result from exchange transactions such as payments received for providing goods and services.

Certain revenue sources that the System relies on for operations including on-behalf payments for fringe benefits and investment income are defined by GASB Statement No. 35 as nonoperating. In addition, transactions related to capital and financing activities are components of net nonoperating revenues.

In fiscal year 2016, $11,104,600 of State appropriations were transferred to the Illinois Hospital Services Fund, which is a special fund established in the State of Illinois Treasury pursuant to the State Finance Act, 30 ILCS 105/6z-30. This fund is owned and operated by the Illinois Department of Healthcare and Family Services. It is not part of or a related organization of the University.

Other operating revenues of the System include capitation payments from Health Maintenance Organizations (HMOs) to provide medical services to subscribers, revenues from laboratory services provided to external organizations, cafeteria/gift shop sales and other sources.

(k) Patient Services Revenue

The System has agreements with third-party payors that provide for payments to the System at amounts different from its established rates. Payment arrangements include prospectively determined rates, discounted charges and per diem payments. Patient service revenue is reported at the estimated net realizable amounts from patients, third-party payors and others for services rendered, including estimated adjustments under reimbursement agreements with third-party payors, certain of which are subject to audit by administrating agencies. These adjustments are accrued on an estimated basis and are adjusted in future periods.

The System provides allowances for uncollectible accounts receivable based upon management's best estimate of uncollectible accounts, considering type, age, collection history, and any other factors as considered appropriate.

(l) Charity Care

The policy of the System is to treat patients in immediate need of medical services without regard to their ability to pay for such services. The System provides care without charge or at amounts less than its established rates to patients who meet the criteria of its charity care policy. This policy defines charity care and provides guidelines for assessing a patient's ability to pay. Eligibility is based on patient qualification, financial resources and service criteria. Because the System does not pursue collection of amounts determined to be charity care, they are not reported as revenue.

The System maintains records to identify and monitor the level of charity care provided. These records include the amount of estimated costs for services rendered and supplies furnished under its charity care policy. The estimated cost of charity care using the System's cost-to-charge ratio was $9,788,000 for fiscal year 2016, an increase of 16% from the prior year, primarily as a result of an increase in inpatient cases. The ratio of costs to charges is calculated based on the System's total operating expenses. Unreimbursed costs of providing care to Medicare and Medicaid patients are not included as charity care.

(m) Classification of Expenses

The majority of the System's expenses are exchange transactions which GASB defines as operating expenses for financial statement presentation. Nonoperating expenses include transfers of State appropriations and capital financing costs.

(n) On-Behalf Payments for Fringe Benefits

In accordance with GASB Statement No. 24, *Accounting and Financial Reporting for Certain Grants and Other Financial Assistance*, the System reported payments made by the State of Illinois (State) on behalf of the System for contributions to State group insurance and retirement programs, including postemployment benefits, for System employees and its retirees of $235,059,283 for the year ended June 30, 2016. The on-behalf payments amount that relates to State group health insurance is an allocation of estimated costs incurred by the State on behalf of the System.

On-behalf payments for fringe benefits are classified as nonoperating revenues and the corresponding expenses are reported in fringe benefits of the System as operating expenses.

(o) Pensions

For purposes of measuring the net pension liability, deferred outflows of resources and deferred inflows of resources related to pensions, and pension expense, information about the plan net position of the State Universities Retirement System (SURS) and additions to/deductions from SURS' plan net position has been determined on the same basis as they are reported by SURS. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value.

For the purposes of financial reporting, the State and participating employers are considered to be under a special funding situation. A special funding situation is defined as a circumstance in which a non-employer entity is legally responsible for making contributions directly to a pension plan that is used to provide pensions to the employees of another entity or entities and either (1) the amount of the contributions for which the non-employer entity is legally responsible is not dependent upon one or more events unrelated to pensions or (2) the non-employer is the only entity with a legal obligation to make contributions directly to a pension plan. The State is considered a non-employer contributing entity. Participating employers are considered employer contributing entities.

(p) Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

(q) New Accounting Pronouncements

The System adopted the provisions of GASB Statement No. 72, *Fair Value Measurement and Application*, which was effective for periods beginning after June 15, 2015. This Statement provides guidance for determining a fair value measurement for financial reporting purposes and for applying fair value to certain investments and disclosures related to all fair value measurements. This Statement requires the System to use valuation techniques that are appropriate under the circumstances and for which sufficient data are available to measure fair value. The techniques should be consistent with one or more of the following approaches: the market approach, the cost approach, or the income approach. The Statement establishes a hierarchy of inputs to valuation techniques used to measure fair value. The hierarchy has three levels. Level 1 inputs are quoted prices, Level 2 inputs are observable inputs other than quoted prices, and Level 3 inputs are unobservable inputs. Implementation of this pronouncement required additional disclosures related to investments in the notes to the System's financial statements.

The System adopted the provisions of GASB Statement No. 76, *The Hierarchy of Generally Accepted Accounting Principles for State and Local Governments*, which was effective for periods beginning after June 15, 2015. The Statement establishes the hierarchy of generally accepted accounting principles (GAAP). This Statement reduces the GAAP hierarchy to two categories of authoritative GAAP (category A – GASB Statements & category B – GASB Tech Bulletins, Implementation Guides, AICPA Literature cleared by GASB) and addresses the use of authoritative and nonauthoritative literature in the event that accounting treatment for a transaction or other event is not specified within a source of authoritative GAAP. Implementation of this pronouncement did not impact the System's financial statements.

(Continued)

The System adopted the provisions of GASB Statement No. 79, *Certain External Investment Pools and Pool Participants*, which was effective for periods beginning after June 15, 2015. This Statement establishes criteria for an external investment pool to qualify for making the election to measure all of its investments at amortized cost for financial reporting purposes. An external investment pool qualifies for that reporting if it meets all of the applicable criteria established in this Statement. The specific criteria address (1) how the external investment pool transacts with participants; (2) requirements for portfolio maturity, quality, diversification, and liquidity, and (3) calculation and requirements of a shadow price. Significant noncompliance prevents the external investment pool from measuring all of its investments at amortized cost for financial reporting purposes. Professional judgment is required to determine if instances of noncompliance with the criteria established by this Statement during the reporting period, individually or in the aggregate, were significant. Implementation of this pronouncement did not impact the System's financial statements.

(2) Cash, Cash Equivalents and Investments

The System has cash and certain investments that are pooled with other University funds for the purpose of securing a greater return on investment and providing an equitable distribution of investment return. Income is distributed based upon average quarterly balances invested in the investment pool.

Nearly all of the University's investments are managed by external professional investment managers, who have full discretion to manage their portfolios subject to investment policy and manager guidelines established by the University, and in the case of mutual funds and other commingled vehicles, in accordance with the applicable prospectus or limited partnership agreement.

The Board follows the State of Illinois Uniform Prudent Management of Institutional Funds Act, 760 ILCS 51/1-11, when managing the University's investments. The Board fulfills its fiduciary responsibility for the management of investments, including endowment farm real estate, by adopting policies to maximize investment return with a prudent level of risk.

The following details the carrying value of the System's cash, cash equivalents, and investments as of June 30, 2016:

U.S. government treasuries	$	9,014,266
U.S. government securities		10,546,970
Commercial paper		9,601,810
Money market funds		6,439,986
Subtotal		35,603,032
Claim on cash and pooled investments		151,850,794
Total cash, cash equivalents and investments	$	187,453,826

(a) Interest Rate Risk

Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. In accordance with its investment policy, the University employs multiple investment managers, of which each has specific maturity assignments related to the operating funds. The funds are structured with different layers of liquidity. Funds expected to be used within one year are invested using the Barclay's Capital 90-Day and Bank of America Merrill Lynch 12-month Treasury Bill Index as performance benchmarks. Core operating funds are invested in longer maturity investments. Core operating funds investment managers' performance benchmarks are the Barclays Capital one-year to three-year Government Bond Index, the Barclays Capital one-year-to-three-year Government Credit Bond Index and the Barclays Capital Intermediate Aggregate Bond Index.

The System's non-pooled investments and maturities as of June 30, 2016 were as follows:

		Maturities (in years)		
		Less than 1	1 - 5	Total
U.S. government treasuries	$	6,001,454	3,012,812	$ 9,014,266
U.S. government securities		9,544,208	1,002,762	10,546,970
Commercial paper		9,601,810		9,601,810
Money market funds		6,439,986		6,439,986
Total cash equivalents and investments	$	31,587,458	4,015,574	$ 35,603,032

Claim on cash and on pooled investments represents the System's share of participation in the University's operating internal investment pool. At June 30, 2016, the University's operating internal investment portfolio had an effective duration of 1.3 years. The operating internal investment pool consists of money market funds and other short-term investments (37%), stocks (10%) and long-term investments such as corporate bonds and government securities (53%).

(b) Credit Risk

Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations. The University's investment policy requires that the University's short-term operating funds be invested in fixed income securities and other short-term fixed income instruments (e.g., money markets). Fixed income securities shall be rated investment grade or better by one or more nationally recognized statistical rating organizations. Securities not covered by the investment grade standard are allowed if, in the manager's judgment, those instruments are of comparable credit quality. Securities that fall below the stated minimum credit requirements subsequent to initial purchase may be held at the manager's discretion.

The University reports the credit ratings of fixed income securities and short-term instruments using Standard and Poor's and Moody's ratings. Securities with split ratings or with a different rating assignment are disclosed using the rating indicative of the greatest degree of risk. At June 30, 2016, the University's operating internal investment pool and non-pooled investments primarily consisted of securities with quality ratings of A or better.

(c) Custodial Credit Risk

Custodial credit risk is the risk that in the event of the failure of the counterparty, the University will not be able to recover the value of its investments or collateral securities that are in the possession of an outside party. Exposure to custodial credit risk relates to investment securities that are held by someone other than the University and are not registered in the University's name. The University investment policy does not limit the value of investments that may be held by an outside party. At June 30, 2016, the System's investments and deposits had no custodial credit risk exposure.

(d) Concentration of Credit Risk

Concentration of credit risk is the risk of loss attributed to the magnitude of the University's investment in a single issuer. The University's investment policy provides that the total operating funds portfolio will be broadly diversified across securities in a manner that is consistent with fiduciary standards of diversification. Issuer concentrations are limited to 5% per issuer of the total market value of the portfolio at the time of purchase, or in the case of securitized securities, an individual issuance trust. These concentration limits do not apply to investments in money market funds, tri-party repurchase agreements or obligations of, or issues guaranteed by, the U.S. Treasury, U.S. agencies or U.S. government sponsored enterprises.

As of June 30, 2016, not more than 5% of the University's total investments were invested in securities of any one issuer, excluding money market funds, tri-party repurchase agreements or obligations of, or issues guaranteed by, the U.S. Treasury, U.S. agencies or U.S. government sponsored enterprises.

(e) Foreign Currency Risk

Foreign currency risk is the risk that changes in exchange rates will adversely affect the fair value of an investment or deposit. The University does not have an overarching policy related to foreign currency risk; however, under each investment manager's respective fund agreement, the portfolio's foreign currency exposure may be unhedged or hedged back into U.S. dollars. The University's operating fund investments generally are not exposed to foreign currency risk.

The University invests in non-U.S. developed and emerging markets through commingled funds invested in non-U.S. equities, global equities, private equity and absolute return strategies. As these funds are reported in U.S. dollars, both price changes of the underlying securities in local markets and changes to the value of local currencies relative to the U.S. dollar are embedded in investment returns.

(f) Investments and Fair Value Measurements

Accounting guidance for fair value establishes a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The fair value hierarchy is as follows:

Level 1 - Quoted prices (unadjusted) for identical assets or liabilities in active markets that the System has the ability to access as of the measurement date. Level 1 inputs would also include investments valued at prices in active markets that the System has access to where transactions occur with sufficient frequency and volume to provide reliable pricing information.

Level 2 - Significant other observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data.

Level 3 - Significant unobservable inputs that reflect a reporting entity's own assumptions about what market participants would use in pricing an asset or liability.

A description of the valuation methodologies used for assets and liabilities measured at fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy, is set forth below.

Investments may be classified as Level 1 when the values are based upon unadjusted quoted prices in active markets for identical assets and generally include active listed equities. Publicly-traded investments that have no or insignificant restrictions are classified in Level 1 of the fair value hierarchy. Level 1 securities would include exchange traded equities.

Investments may be classified as Level 2 when the values include inputs that are directly observable for an asset (including quoted prices for similar assets), as well as inputs that are not directly observable for the asset. These inputs are derived principally from or corroborated by observable market data through correlation or by other means (market-corroborated inputs). The concept of market-corroborated inputs is intended to incorporate observable market data (such as interest rates and yield curves that are observable at commonly quoted intervals) based upon an assessment of factors relevant to the asset or liability. Level 2 securities include US Treasury bonds and bills, US government agencies, international government bonds and agencies, nongovernment mortgage-backed securities, asset backed securities, corporate bonds, commercial paper, and municipal bonds.

Investments may be classified as Level 3 when the values include inputs that are unobservable and Level 1 and Level 2 inputs are not available. The values are based upon the best information available under the circumstances and may include management's own data. Level 3 securities include certain types of inactively traded corporate bonds and equities.

The following table summarizes assets measured at fair value as of June 30, 2016, segregated by the level of the valuation inputs within the hierarchy utilized to measure fair value:

		Fair Value Measurements as of June 30, 2016
Investments in which fair value was measured based on significant other observable inputs (Level 2):		Total
U.S. government treasuries	$	9,014,266
U.S. government securities		10,546,970
Commercial paper		9,601,810
Total subject to fair value hierarchy		29,163,046
Investments measured at cost:		
Money market funds		6,439,986
Total cash equivalents and investments	$	35,603,032

(3) Capital Assets

Net interest cost incurred on borrowed funds during the period of construction of capital assets is capitalized as a component of the cost of acquiring those assets. Net interest of $802,478 was capitalized during the year ended June 30, 2016. The capital assets of the System are not pledged to secure outstanding indebtedness of the Board.

Capital asset activity for the year ended June 30, 2016 is summarized as follows:

Capital assets					
	Beginning balance	Additions	Retirements	Transfers	Ending balance
Nondepreciable capital assets:					
Land	$ 770,917				$ 770,917
Construction in process	15,449,690	10,771,336		(9,316,865)	16,904,161
Total nondepreciable capital assets	16,220,607	10,771,336		(9,316,865)	17,675,078
Depreciable capital assets:					
Buildings	234,229,060	341,241		7,084,028	241,654,329
Leasehold improvements	2,177,211			142,941	2,320,152
Equipment	151,852,317	8,076,839	(1,030,558)	998,065	159,896,663
Software	33,261,556			1,091,831	34,353,387
Total depreciable capital assets	421,520,144	8,418,080	(1,030,558)	9,316,865	438,224,531
Less accumulated depreciation:					
Buildings	103,246,212	7,222,659			110,468,871
Leasehold improvements	2,164,896	26,607			2,191,503
Equipment	118,668,202	10,451,996	(995,103)		128,125,095
Software	27,742,567	2,366,344			30,108,911
Total accumulated depreciation	251,821,877	20,067,606	(995,103)	—	270,894,380
Total depreciable capital assets, net	169,698,267	(11,649,526)	(35,455)	9,316,865	167,330,151
Total capital assets, net	$ 185,918,874	(878,190)	(35,455)	—	$ 185,005,229

(4) Long-Term Obligations

During fiscal year 1997, the University issued $25,000,000 of Health Services Facilities System Revenue Bonds Series 1997B. The bonds are variable rate bonds which bear interest at a rate determined weekly and paid monthly. Proceeds from the bonds were used to finance the costs of a new ambulatory care facility in Chicago, a medical office building in Rockford, Illinois and to pay costs incidental to the issuance of the bonds.

During fiscal year 2008, the University issued $41,215,000 Variable Rate Demand Health Services Facilities System Revenue Refunding Bonds, Series 2008. The bonds are variable rate bonds which bear interest at a rate determined weekly. Proceeds from the bonds funded the redemption of the Variable Rate Demand Health Services Facilities System Revenue Refunding Bonds, Series 2007 on July 28, 2008 and paid costs incidental to the issuance of the bonds. The difference between the reacquisition price and net carrying amount of the old debt, loss on refunding, was $4,485,000. This loss is deferred and amortized as a component of interest expense over the remaining life of the old debt or the life of the new debt, whichever is shorter.

During fiscal year 2014, the University issued $70,785,000 Health Services Facilities System Revenue Bonds, Series 2013. The bonds are fixed rate bonds which bear interest payable on April 1 and October 1 of each year. Proceeds from the bonds are being used to finance the costs of certain construction, renovation and equipment purchases for the System and to pay costs incidental to the issuance of the Series 2013 Bonds. The bond premium, $591,216, is deferred and amortized over the remaining life of the issue.

Long-term obligations activity for the year ended June 30, 2016 was as follows:

Long–term obligations

Series	Rate on June 30 outstanding debt	Fiscal year maturity dates	Beginning balance	Additions	Deductions	Ending balance	Current portion
Bonds payable:							
1997B	Variable	2017 – 2027	$ 14,400,000		(1,000,000)	$ 13,400,000	$ 1,000,000
2008	Variable	2017 – 2027	33,665,000		(2,240,000)	31,425,000	2,365,000
2013	5% to 6.25%	2028 – 2043	70,785,000			70,785,000	
			118,850,000	—	(3,240,000)	115,610,000	3,365,000
Unamortized premium			554,106		(20,333)	533,773	20,334
Total bonds payable			119,404,106	—	(3,260,333)	116,143,773	3,385,334
Other obligations			5,439,426		(2,122,250)	3,317,176	1,976,042
Total long–term debt			124,843,532	—	(5,382,583)	119,460,949	5,361,376
Compensated absences			22,821,109	2,717,975	(2,210,865)	23,328,219	2,255,328
Total long–term obligations			$ 147,664,641	2,717,975	(7,593,448)	$ 142,789,168	$ 7,616,704

The bonds do not constitute obligations of the State of Illinois. Bond principal and interest payments are funded from revenues pledged from (a) System net revenues, principally consisting of all charges, income and revenues received from the continued use and operation of the System, excluding depreciation charges and transfers, (b) Medical Service Plan (MSP) revenues net of bad debt expense and (c) College of Medicine tuition revenue. These revenues for the year ended June 30, 2016 are as follows:

System net revenues	$ 19,421,220
Adjusted MSP revenues	196,923,534
College of Medicine student tuition	53,788,490
Total	$ 270,133,244

The table below shows the amount of revenues pledged for future principal and interest payments on the bonds:

Pledged revenues

Bond issue(s)	Purpose	Source of revenue pledged	Future revenues pledged[1]	Term of commitment	Debt service to pledged revenues (current year)
Series 1997B, 2008 and 2013	Additions to System and Refunding	Net System revenue, MSP revenue net of bad debt expense, College of Medicine net tuition revenue	$ 208,877,746	2043	3.19%

[1] Total estimated future principal and interest payments on debt

The resolutions authorizing the bonds provides for the establishment of separate funds as follows: Revenue Fund, Project Fund, Repair and Replacement Reserve, Equipment Reserve, Bond and Interest Sinking Fund and Development Reserve. All income and revenues received from the continued use and operation of the System, as provided for by the Bond Resolution, are to be deposited in the Revenue Fund and used to pay necessary operation and maintenance expenses of the System. The Bond Resolution also requires transfers to funds as follows:

Project Fund – at the discretion of the University Comptroller, amounts not needed to complete construction and renovation projects specified in the Bond Resolution are required to be transferred either to the Repair and Replacement Reserve or to the Bond and Interest Sinking Fund.

Repair and Replacement Reserve – an amount calculated as specified in the Bond Resolution to provide for the cost of unusual maintenance and repairs.

Equipment Reserve – an amount approved by the Board for the acquisition of movable equipment to be installed in the facilities constituting the System. The reserve may not exceed 20% of the book value of the movable equipment of the System.

Bond and Interest Sinking Fund – amounts transferred into the Bond and Interest Sinking Fund sufficient to pay principal and interest as it becomes due on the outstanding bonds.

Development Reserve – an amount approved by the Board for System development. No transfers were authorized by the Board during the year ended June 30, 2016, and there was not a balance in the reserve at June 30, 2016.

The System made all required transfers for the year ended June 30, 2016.

After fulfillment of the provisions described above, the surplus, if any, remaining in the Revenue Fund may be used at the Board's option (a) to redeem bonds of the System which are subject to early redemption, (b) to improve or add facilities to the System, or (c) for any other lawful purpose.

Assets restricted by Bond Resolution were held for the following purposes at June 30, 2016:

Restricted assets:		
Cash and investments	$	50,573,191
Purpose:		
Capital projects, bond projects	$	34,708,356
Repair and replacement reserve		14,693,176
Bond and interest sinking fund		1,171,659
Total assets limited as to use		50,573,191
Less amounts required for current liabilities		(1,162,943)
Total for long-term use	$	49,410,248

(a) Health Services Facilities System Variable Rate Debt and Interest Rate Swap Agreement

Demand Provisions

The System's Series 1997B and 2008 bonds mature serially through October 2026. These bonds have variable interest rates that are adjusted periodically (i.e., daily, weekly, or monthly), generally with interest paid at the beginning of each month. The bonds are subject to purchase on the demand of the holder at a price equal to principal plus accrued interest on seven days' notice and delivery to the University's remarketing agents. The University pays the remarketing agent fees on the outstanding bond balance. If the remarketing agent is unable to resell any bonds that are "put" to the agent, the University has a standby bond purchase agreement with a liquidity facility entity. The University has several such agreements, with the fees on the Bond Purchase Commitment (formula based on outstanding bonds plus pro forma interest). The University, in the event a liquidity facility is utilized, has reimbursement agreements with associated financial entities. Generally, the payback period, in which the initial payment is due 366 days after the agreement takes effect, is five to seven years, at an interest rate initially set at slightly above prime or the federal funds rate.

The required future interest payments for these variable rate bonds have been calculated using the current interest rate, based upon short-term tax-exempt rates, or the synthetic fixed rate, as illustrated in the table below:

Variable rate bonds at June 30, 2016

Bond issues	Interest rate at June 30, 2016	Remarketing agent	Remarketing fee	Liquidity facility Bank	Liquidity facility Expiration	Liquidity facility Insured by	Liquidity facility Fee
HSFS, Series 1997B	0.46%	JPMorgan Securities	0.070%	Wells Fargo	May 30, 2019	Letter of Credit	0.47%
HSFS, Series 2008	0.41	Goldman Sachs	0.070	Wells Fargo	May 30, 2019	Letter of Credit	0.47

Interest Rate Swap Agreement

In fiscal year 2009, the University entered into a variable-to-fixed interest rate swap agreement with Loop Financial Products I LLC (Loop). The purpose of this interest rate swap was to hedge the Series 2008 debt by effectively changing the variable interest rate on the bonds to a synthetic fixed rate. When the swap agreement was entered, the notional amount of the swap was $40,875,000. In accordance with the swap agreement, the University makes monthly payments to the counterparty (Loop) equal to 3.534% of the notional amount and receives monthly payments from Loop equal to 68% of the one-month London Interbank Offered Rate (LIBOR). The swap will terminate in October 2026. As of June 30, 2016, the notional amount of the swap was $31,170,000.

The University engaged a third-party consultant to determine the fair value of the swap agreement. The fair value provided by the consultant was derived from proprietary models based upon well-recognized financial principles and reasonable estimates about relevant market conditions. The fair value (Level 2 measurement) is recognized as a noncurrent liability and was $4,766,649 as of June 30, 2016.

In connection with the interest rate swap agreement, the University may be exposed to various types of risk:

Credit Risk – As of June 30, 2016, the University was not exposed to credit risk because the swap had a negative fair value. If interest rates change and the fair value of the swap becomes positive, the University would be exposed to credit risk in the amount of the derivative's fair value. The counterparty may have to post collateral in the University's favor in certain conditions, and the University would never be required to post collateral in the counterparty's favor.

Interest Rate Risk – During fiscal year 2016, low interest rates exposed the University to interest rate risk, which adversely affected the fair value of the swap agreement.

Termination Risk – The swap is scheduled to terminate in October 2026. The University has the option to terminate the swap early. The University or Loop may terminate the swap if the other party fails to perform under the terms of the contract. The University may terminate the swap if both credit ratings of the counterparties fall below BBB+ as issued by Standard & Poor's and Baa1 as issued by Moody's Investors Service. As of June 30, 2016, the counterparty (Loop) credit rating by Standard & Poor's was BBB+ and by Moody's Investors Service was Baa2.

If the swap is terminated, the Series 2008 variable-rate bonds would no longer carry a synthetic fixed interest rate. In addition, if at the time of termination, the swap has a negative fair value, the University would be liable to Loop for a payment equal to the swap's fair value.

Basis Risk – The swap exposes the University to basis risk should the relationship between LIBOR and the variable weekly rate determined by the remarketing agent change, changing the synthetic rate on the bonds. If a change occurs that results in the difference in rates widening, the expected cost savings may not be realized.

Other Risks – Since the swap agreement extends to the maturity of the Series 2008 bonds, it does not expose the University to rollover risk. In addition, the University is not exposed to foreign currency risk associated with this swap agreement. The University is not exposed to market access risk as of June 30, 2016. However, if the University decides to issue refunding bonds and credit is more costly at that time, it could be exposed to market access risk.

(b) Debt Service Requirements

Future debt service requirements for the Series 1997B, 2008 and 2013 Bonds at June 30, 2016 were as follows:

	Principal	Interest
2017	$ 3,365,000	$ 5,362,400
2018	3,485,000	5,272,018
2019	3,620,000	5,179,091
2020	3,755,000	5,082,422
2021	3,900,000	4,982,795
2022 - 2026	21,825,000	23,278,356
2027 - 2031	16,760,000	20,062,726
2032 - 2036	19,435,000	15,128,450
2037 - 2041	26,435,000	8,125,988
2042 - 2043	13,030,000	793,500
Total debt service	115,610,000	$ 93,267,746
Unamortized premium	533,773	
Total bonds payable	$ 116,143,773	

The required debt service for the variable rate Series 1997B and 2008 Bonds has been calculated using the current interest rate of 0.46% and 0.41%, respectively, over the remaining life of the bonds.

Using the actual rate in effect as of June 30, 2016 (0.41% for Series 2008), debt service requirements of the variable rate debt and net swap payments, assuming current interest rates remain the same for their term, were as follows. As rates vary, variable-rate bond interest payments and net swap payments will also vary.

Health Services Facilities System Revenue Refunding Bonds, Series 2008
Variable-Rate Debt Service Requirements

	Variable rate bonds		Interest rate	
	Principal	Interest	swaps, net	Total
2017	$ 2,365,000	128,842	918,448	$ 3,412,290
2018	2,485,000	119,146	842,363	3,446,509
2019	2,520,000	108,958	764,531	3,393,489
2020	2,655,000	98,626	683,251	3,436,877
2021	2,700,000	87,740	599,874	3,387,614
2022 - 2026	15,325,000	262,708	1,626,848	17,214,556
2027	3,375,000	13,837	25,608	3,414,445
Total	$ 31,425,000	819,857	5,460,923	$ 37,705,780

Other obligations consist of third-party financing arrangements for equipment, which have maturity dates from 2017 through 2019 and interest rates ranging from 1.26% to 6.10%.

As of June 30, 2016, future minimum payments under other obligations are as follows:

	Principal	Interest
2017	$ 1,976,041	$ 51,570
2018	1,144,354	19,885
2019	196,781	3,235
Total minimum payments – other obligations	$ 3,317,176	$ 74,690

(5) Operating Leases

The System leases various real property and equipment under operating lease agreements, including leases renewed on an annual basis. Total rental expense under these agreements was $1,498,665 for the year ended June 30, 2016.

As of June 30, 2016, future minimum payments under operating leases are as follows:

2017	$ 1,548,211
2018	1,562,017
2019	1,012,024
2020	873,564
2021	369,458
2022 - 2026	861,591
Total minimum payments – operating leases	$ 6,226,865

(6) Patient Accounts Receivable

Patient accounts receivable as of June 30, 2016, reported as current assets, consisted of the following amounts:

Patient accounts receivable, net of contractual allowances and charity care:		
Medicaid managed care	$	211,868,948
HMO/PPO		95,479,794
Medicaid		75,790,277
Medicare		32,162,474
Commercial insurance		32,079,062
Medicare managed care		30,110,690
Self-pay and other		9,178,994
Total		486,670,239
Less allowance for uncollectible accounts		(316,839,181)
Total patient accounts receivable, net	$	169,831,058

The System grants credit without collateral to its patients, most of whom are local residents and are insured under third-party payor agreements. The mix of receivables from patients and third-party payors at June 30, 2016 was as follows:

Medicaid managed care	43.5%
HMO/PPO	19.6%
Medicaid	15.6%
Medicare	6.6%
Commercial insurance	6.6%
Medicare managed care	6.2%
Self-pay and other	1.9%
	100.0%

(7) Net Patient Service Revenues

Approximately 93% of the System's net patient service revenue was derived from Medicare, Medicaid and managed care programs for the year ended June 30, 2016. Reimbursement under these programs provided for payments to the System at amounts different from its established rates, based on a specific amount per case, or a contracted price, for rendering services to program beneficiaries. The System records contractual allowances in the current period representing the difference between charges for services rendered and the expected payments under these programs, and adjusts them in future periods as final settlements through cost reports or other means are determined.

Net patient service revenue for the fiscal year ending June 30, 2016 was as follows:

Medicaid managed care	$ 715,756,646
HMO/PPO	628,757,421
Medicare	497,682,713
Medicaid	175,580,069
Medicare managed care	104,952,597
Commercial insurance	59,223,562
Self-pay and other	101,131,161
Total gross revenue	2,283,084,169
Less:	
Contractual allowances	(1,617,149,607)
Provision for uncollectible accounts	(45,528,396)
Net patient revenue	$ 620,406,166

A summary of the payment arrangements with major third-party payers follows:

Medicare and Medicare Managed Care – Inpatient services rendered to Medicare program beneficiaries are paid at prospectively determined rates. These rates vary according to a patient classification system that is based on clinical, diagnostic and other factors. Inpatient services are paid at prospectively determined rates that are based on the patients' diagnosis. Outpatient payments to the Hospital are based on a predetermined package rate based on services provided to patients. The Hospital is reimbursed for certain services at tentative rates with final settlement determined after submission of annual cost reports by the Hospital and audits thereof by the Medicare fiscal intermediary. The System's Medicare cost reports have been audited by the Medicare fiscal intermediary through June 30, 2012. For the fiscal year ended June 30, 2016, changes in estimates related to the settlement of cost reports have been recognized as an increase in net patient service revenue of approximately $7,344,000 as a result of settled cost reports and changes in estimates related to services rendered in previous years.

Medicaid and Medicaid Managed Care – Services are reimbursed at prospectively determined rates. Medicaid payment methodologies and rates for services rendered are subject to change and the amount of funding available to the Illinois Hospital Services Fund. Such changes could have a significant effect on the System's revenues.

HMO/PPO – System has payment agreements with certain health maintenance organizations, (HMOs) and preferred provider organizations (PPOs). The basis for payment under these agreements includes prospectively determined rates-per-discharge, discounts from established charges, prospectively determined daily rates and capitated per-member per-month rates.

(8) Retirement and Postemployment Benefits

(a) Retirement Benefits

General Information about the Pension Plan

Plan Description: The University contributes to the State Universities Retirement System of Illinois, a cost-sharing multiple-employer defined benefit plan with a special funding situation whereby the State makes substantially all actuarially determined required contributions on behalf of the participating employers. SURS was established July 21, 1941 to provide retirement annuities and other benefits for staff members and employees of State universities, certain affiliated organizations, and certain other State educational and scientific agencies and for survivors, dependents and other beneficiaries of such employees. SURS is considered a component unit of the State's financial reporting entity and is included in the State's financial reports as a pension trust fund. SURS is governed by Section 5/15, Chapter 40, of the *Illinois Compiled Statutes*. SURS issues a publicly available financial report that includes financial statements and required supplementary information. That report may be obtained by accessing the website at www.surs.org.

Benefits Provided: A traditional benefit plan was established in 1941. Public Act 90-0448 enacted effective January 1, 1998, established an alternative defined benefit program known as the portable benefit package. The traditional and portable plan Tier 1 refers to members that began participation prior to January 1, 2011. Public Act 96-0889 revised the traditional and portable benefit plans for members who begin participation on or after January 1, 2011, and who do not have eligible Illinois reciprocal system services. The revised plan is referred to as Tier 2. New employees are allowed 6 months after their date of hire to make an irrevocable election. A summary of the benefit provisions as of June 30, 2015 can be found in the SURS' comprehensive annual financial report (CAFR) Notes to the Financial Statements.

Eligible employees must participate upon initial employment. Employees are ineligible to participate if (a) employed after having attained age 68; (b) employed less than 50% of full time; or (c) employed less than full time and attending classes with an employer. Of those University employees ineligible to participate, the majority are students at the University.

Contributions: The State of Illinois is primarily responsible for funding the System on behalf of the individual employers at an actuarially determined amount. Public Act 88-0593 provides a Statutory Funding Plan consisting of two parts: (i) a ramp-up period from 1996 to 2010 and (ii) a period of contributions equal to a level percentage of the payroll of active members of the System to reach 90% of the total Actuarial Accrued Liability by the end of Fiscal Year 2045. Employer contributions from "trust, federal, and other funds" are provided under Section 15-155(b) of the Illinois Pension Code and require employers to pay contributions which are sufficient to cover the accruing normal costs on behalf of applicable employees. The employer normal cost for fiscal year 2015 and 2016 respectively, was 11.71% and 12.69% of employees' payroll. The normal cost is equal to the value of current year's pension benefit and does not include any allocation for past unfunded liability or interest on the unfunded liability. Plan members are required to contribute 8.0% of their annual covered salary. The contribution requirements of plan members and employers are established and may be amended by the Illinois General Assembly.

Participating employers make contributions toward separately financed specific liabilities under Section 15.139.5(e) of the Illinois Pension Code (relating to contributions payable due to the employment of "affected annuitants" or specific return to work annuitants) and Section 15.155(g) (relating to contributions payable due to earning increases exceeding 6% during the final rate of earnings period).

(Continued)

Pension Liabilities, Expense, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions

Net Pension Liability: At June 30, 2015, SURS reported a net pension liability (NPL) of $23,756,361,087. The net pension liability was measured as of June 30, 2014.

Employer Proportionate Share of Net Pension Liability: The amount of the proportionate share of the net pension liability to be recognized for the System is $0. The proportionate share of the State's net pension liability associated with the System is $1,770,601,518. This amount should not be recognized in the financial statement. The net pension liability and total pension liability as of June 30, 2015 was determined based on the June 30, 2014 actuarial valuation rolled forward. The basis of allocation used in the proportionate share of net pension liability is the actual reported pensionable earnings made to SURS during fiscal year 2015.

Pension Expense: At June 30, 2015 SURS reported a collective net pension expense of $1,994,587,170.

Employer Proportionate Share of Pension Expense: The employer proportionate share of collective pension expense should be recognized similarly to on-behalf payments as both revenue and matching expenditure in the financial statements. The basis of allocation used in the proportionate share of collective pension expense is the actual reported pensionable contributions made to SURS during fiscal year 2015. As a result, the University recognized on-behalf revenue and pension expense of $836,040,577 for fiscal year ended June 30, 2016, of which $148,659,831 was related to the System.

Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions: Deferred Outflows of resources are the consumption of net position by SURS that is applicable to future reporting periods.

SURS Collective Deferred Outflows and Deferred Inflows of Resources by Sources

		Deferred Outflows of Resources	Deferred Inflows of Resources
Difference between expected and actual experience	$	27,312,043	
Changes in assumption		609,393,909	
Net difference between projected and actual earnings on pension plan investments		593,840,642	953,329,464
Total	$	1,230,546,594	953,329,464

SURS Collective Deferred Outflows and Deferred Inflows of Resources by Year to be Recognized in Future Pension Expense

Year Ending June 30		Net Deferred Outflows of Resources
2016	$	154,951,326
2017		118,957,720
2018		(145,152,075)
2019		148,460,159
2020		
Thereafter		
Total	$	277,217,130

Assumptions and Other Inputs

Actuarial assumptions: The actuarial assumptions used in the June 30, 2015 valuation were based on the results of an actuarial experience study for the period June 30, 2010 – 2014. The total pension liability in the June 30, 2015 actuarial valuation was determined using the following actuarial assumptions, applied to all periods included in the measurement:

Inflation	2.75 percent
Salary increases	3.75 to 12.00 percent, including inflation
Investment rate of return	7.25 percent beginning with the actuarial valuation as of June 30, 2014

Mortality rates were based on the RP2000 Combined Mortality Table, projected with Scale AA to 2017, sex-distinct, with rates multiplied by 0.80 for males and 0.85 for females.

The long-term expected rate of return on pension plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. Best estimates of arithmetic real rates of return were adopted by the plan's trustees after considering input from the plan's investment consultant(s) and actuary(s). For each major asset class that is included in the pension plan's target asset allocation as of June 30, 2015, these best estimates are summarized in the following table:

Asset Class	Target Allocation	Long-Term Expected Real Rate of Return
U.S. Equity	23%	5.77%
Private Equity	6%	9.23%
Non-U.S. Equity	19%	6.69%
Global Equity	8%	6.51%
Fixed Income	19%	1.12%
Treasury-Inflation Protected Securities	4%	1.22%
Emerging Market Debt	3%	4.61%
Real Estate REITS	4%	5.85%
Direct Real Estate	6%	4.37%
Commodities	2%	4.06%
Hedged Strategies	5%	3.99%
Opportunity Fund	1%	6.80%
Total	100%	5.02%
Inflation		3.00%
Expected Arithmetic Return		**8.02%**

Discount Rate: A single discount rate of 7.120% was used to measure the total pension liability. This single discount rate was based on an expected rate of return on pension plan investments of 7.250% and a municipal bond rate of 3.80% (based on the weekly rate closest to but not later than the measurement date of the 20-Year Bond Buyer Index as published by the Federal Reserve). The projection of cash flows used to determine this single discount rate were the amounts of contributions attributable to current plan members and assumed that plan member contributions will be made at the current contribution rate and that employer contributions will be made at rates equal to the statutory contribution rates under SURS' funding policy. Based on these assumptions, the pension plan's fiduciary net position and future contributions were sufficient to finance the benefit payments through the year 2072. As a result, the long-term expected rate of return on pension plan investments was applied to projected benefit payments through the year 2072, and the municipal bond rate was applied to all benefit payments after that date.

Sensitivity of the SURS' Net Pension Liability to Changes in the Discount Rate: Regarding the sensitivity of the net pension liability to changes in the single discount rate, the following presents the plan's net pension liability, calculated using a single discount rate of 7.12%, as well as what the plan's net pension liability would be if it were calculated using a single discount rate that is 1-percentage-point lower or 1-percentage-point higher:

1% Decrease 6.12%	Current Single Discount Rate Assumption 7.12%	1% Increase 8.12%
$28,929,333,917	$23,756,361,087	$19,470,982,362

Additional information regarding the SURS basic financial statements including the Plan Net Position can be found in the SURS comprehensive annual financial report by accessing the website at www.SURS.org.

(b) Postemployment Benefits

The State Employees Group Insurance Act of 1971 (Act), as amended, authorizes the State to provide health, dental, vision and life insurance benefits for certain retirees and their dependents. Substantially all State and university component unit employees become eligible for these other postemployment benefits (OPEB) if they eventually become annuitants of one of the State sponsored pension plans. The Department of Central Management Services administers these benefits for annuitants with the assistance of the State's sponsored pension plans. The portions of the Act related to OPEB establish a cost-sharing multiple-employer defined-benefit OPEB plan (plan) with a special funding situation in which the State funds substantially all nonparticipant contributions. The plan does not issue a stand-alone financial report but is included as a part of the State's financial statements. A copy of the financial statements of the State can be obtained at www.ioc.state.il.us.

The health, dental and vision benefits provided to and contribution amounts required from annuitants are the result of collective bargaining between the State and various unions that represent the State and the university employees in accordance with limitations established in the Act. Therefore, the benefits provided and contribution amounts are subject to periodic change. The Act requires the State to provide life insurance benefits for annuitants equal to their annual salary as of the last day of employment until age 60, at which time the benefit amount becomes $5,000.

The State makes substantially all of the contributions for OPEB on behalf of the State universities. Since the State contributes substantially all of the employer contributions, the single-employer provisions of GASB Statement No. 45, *Accounting and Financial Reporting by Employers for Postemployment Benefits Other Than Pensions*, have been followed for reporting the plan. The State is not required to and does not fund the plan other than the pay-as-you-go amount necessary to provide the current benefits.

(9) Related-Party Transactions

The University charged the System for administrative and other services totaling $14,774,102 in fiscal year 2016. These charges represent a portion of the estimated administrative and other service costs incurred by the University in support of the System. The process for estimating the costs charged to the System was refined in fiscal year 2016. An additional $28,291,861 was paid by the University on behalf of the System for salaries and other costs for the year ended June 30, 2016, in exchange for System services and facilities provided, and are recognized as operating expenses (salaries and general) and operating revenues.

The System provides funds to the College of Medicine to support programmatic initiatives that benefit the System's strategic goals and to pay for salaries of physicians and staff in the College of Medicine who serve as medical directors and physician leaders of the System under various agreements. During fiscal year 2016, approximately $33.7 million was recognized in supplies and general expenses by the System under these agreements.

The System provides funds to the College of Pharmacy under various arrangements to pay for salaries of clinical pharmacists, faculty and residents and to support programs that benefit the System's clinical operations. During fiscal year 2016, approximately $11.3 million was recognized in salaries and wages and supplies and general expenses under these arrangements.

The System contracts with the University's College of Pharmacy to provide certain pharmacy services related to the Federal drug discount program under Section 340b of the Public Health Service Act, under which the System is a covered entity and purchases drugs for dispensing to eligible outpatients. During fiscal year 2016, the System paid approximately $7.3 million to the College of Pharmacy for these services.

Most healthcare services rendered by physicians at the University are charged, billed and collected through the MSP. For ambulatory care services, there is a charge for both a professional and technical component. The System bills and collects on behalf of the MSP for the professional component of ambulatory care services. Based on the underlying agreements between the MSP and the University, the System remits funds collected to the MSP. Total MSP remittances from the System for the year ended June 30, 2016 relating to the billing and collection of physician fees and the delivery of ambulatory care were approximately $28.5 million.

During 2016, various departments within the College of Medicine agreed to reimburse the System for a portion of the expenses related to the resident and fellowship training program. This reimbursement, which totaled $2,497,959, has been reflected in the financial statements as a reduction of the related expenses.

(10) Commitments and Contingencies

(a) Commitments

At June 30, 2016, the System had commitments on various construction projects and contracts for repairs and renovation of health services facilities of $17,686,943.

(b) Contingencies

The University (including the System) is involved in regulatory audits arising in the normal course of business.

In 2016 and 2015, the System received notices from Medicare requiring that it provide documentation for certain claims as part of the Recovery Audit Contractor (RAC) program. The System has responded to these requests. Review of claims through the RAC program may result in a liability to Medicare which could have a material impact on the System's net patient service revenues.

The System is subject to program compliance audits from the Health Resources and Services Administration (HRSA) of the US Department of Health and Human Services in relation to the System's participation as a covered entity in the Federal drug discount program under Section 340b of the Public Health Service Act.

The University (including the System) is a defendant in a number of legal actions primarily related to medical malpractice. These legal actions have been considered in estimating the University's accrued self-insurance liability, which covers hospital and medical professional/general liability; estimated general and contractual liability, and workers' compensation liability. At June 30, 2016, the University's total accrued self-insurance liability was $219,234,681.

The University's accrued self-insurance liability includes $159,761,990 at June 30, 2016, for the most probable and reasonably estimable ultimate cost for medical malpractice liabilities. Ultimate cost consists of amounts estimated by the University's risk management division and actuaries for asserted claims, unasserted claims arising from reported incidents, expected litigation expenses and amounts determined by actuaries using relevant industry data and System specific data to cover projected losses for claims incurred but not yet reported. The System contributes to the University's self-insurance reserve through annual assessments. Therefore, no liability related to medical malpractice claims is included in the System's financial statements, but the entire self-insurance liability is reflected in the University's financial statements.

(11) Subsequent Events

In 2004, the Office of the Inspector General of the U.S. Department of Health and Human Services (OIG) conducted an audit of the Medicaid disproportionate share hospital (DSH) programs in ten states for the years 1997 through 2000, including the State of Illinois. The OIG's audit report indicated that the State of Illinois' Medicaid DSH payments exceeded hospital-specific limits, and that the Federal share of those overpayments was $145.8 million, of which $140.3 million related to payments made to the University's hospital. The Illinois Department of Healthcare and Family Services (IDHFS) believes it followed guidelines published by the U. S. Centers for Medicare and Medicaid Services (CMMS) and that its methodology for calculating the hospital-specific limit had consistently been approved by CMMS. However, on July 25, 2016, CMMS issued a formal notice to IDHFS that it had adopted the OIG's recommendation and was requesting repayment by IDHFS of the $140.3 million associated with the University's hospital. In January 2017, IDHFS filed an appeal notice with the U.S. Department of Health and Human Services Departmental Appeals Board. At this time, neither CMMS nor IDHFS has made a repayment request to the University or the System. The impact to the University and System, if any, will be determined after the appeal process concludes.

Required Supplementary Information
Year Ended June 30, 2016

Schedule of University of Illinois Health Services Facilities System Proportionate Share of the Net Pension Liability	Fiscal Year 2015	Fiscal Year 2014
(a) Proportion Percentage of the Collective Net Pension Liability	0%	0%
(b) Proportion Amount of the Collective Net Pension Liability	$0	$0
(c) Portion of Nonemployer Contributing Entities' Total Proportion of Collective Net Pension Liability associated with Employer	$1,770,601,518	$1,546,893,194
Total (b) + (c)	$1,770,601,518	$1,546,893,194
Employer Covered-employee payroll	$303,779,641	$299,799,478
Proportion of Collective Net Pension Liability associated With Employer as a percentage of covered-employee payroll	582.86%	515.98%
SURS Plan Net Position as a Percentage of Total Pension Liability	42.37%	44.39%

Changes of benefit terms. There were no benefit changes recognized in the Total Pension Liability as of June 30, 2015.

Changes of assumptions. In accordance with Illinois Compiled Statutes, an actuarial review is to be performed at least once every three years to determine the reasonableness of actuarial assumptions regarding the retirement, disability, mortality, turnover, interest and salary of the members and benefit recipients of SURS. An experience review for the years June 30, 2010 to June 30, 2014 was performed in February 2015, resulting in the adoption of new assumptions as of June 30, 2015.

- Mortality rates. Change from the RP 2000 Mortality table projected to 2017, sex distinct, to the RP-2014 mortality tables with projected generational mortality improvement. Change to a separate mortality assumption for disabled participants.

- Salary increases. Change assumption to service-based rates, ranging from 3.75 percent to 15.00 percent based on years of service, with underlying wage inflation of 3.75 percent.

- Normal retirement rates. Change to retirement rates at ages younger than 60, age 66, and ages 70-79 to reflect observed experiences.

- Early retirement rates. Change to a slight increase to the rates at ages 55 and 56.

- Turnover rates. Change to produce lower expected turnover for members with less than 10 years of service and higher turnover for members with more than 10 years of service than the currently assumed rates.

- Disability rates. Decrease rates and have separate rates for males and females to reflect observed experience.

- Dependent assumption. Maintain the current assumption on marital status that varies by age and sex and the assumption that males are three years older than their spouses.

*Note: The System implemented GASB No. 68 in fiscal year 2015. The information above is presented for as many years as available. The Schedule is intended to show information for 10 years.
